

What is BMB?

Biochemistry and Molecular Biology is a four-year degree program that allows students to explore and understand the chemical processes that are the driving forces of life. Students graduate with a deep understanding of life at the molecular level and a number of invaluable laboratory techniques.

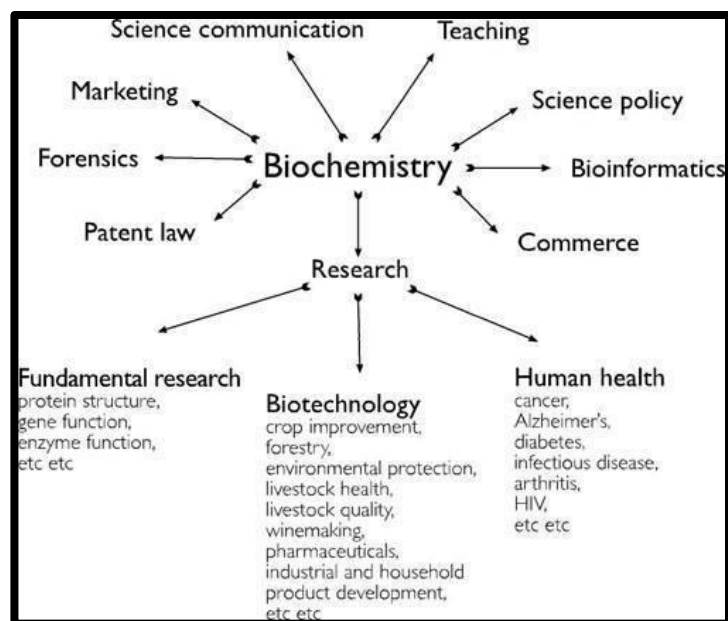

What fields can I enter with a BMB degree?

The concepts and techniques learned in the BMB major are essential and applicable to countless disciplines in the life sciences, other scientific fields, and even careers outside of research altogether!

Who Could I work for?

- Colleges and Universities
- Hospitals
- Bio-Tech Companies
- Government Agencies
 - Center for Disease Control
 - Dept. of Agriculture
 - Dept. of Defense
 - Environmental Protection Agency
- Medical Research Companies
 - National Institutes of Health
 - National Cancer Institute
 - National Human Genome Research Institute
- Pharmaceutical Companies
- Cosmetic Companies
- Forensic Laboratories
- Law Firms
