Private Foundations - Request for Proposals & Letters of Intent
eNewsletter sent January 10, 2014

Corporate and Foundation Relations (CFR) can assist you in applying for non-governmental, institutional grant opportunities at the $25,000 level or greater. For all grant opportunities when funders require submitting as a 501c3 organization, we can arrange applying through the University of Massachusetts Foundation. This 501c3 process requires that all the finalized application materials (draft of the narrative is sufficient) be given to our CFR office four business days prior to the Office of Grants and Contracts Administration deadline. Most of the funding opportunities below are offered annually. If time does not permit applying now, we recommend putting them on your proposal schedule for next year. To request addition to or removal from this notice and for general questions, please contact Dot Morua-Fernandes, dot@admin.umass.edu. For additional assistance and referrals, contact Linda Sopp, lsopp@admin.umass.edu. Please share widely. Thank you!

Funding opportunities included in this issue fall in these categories:
- Science & Medical
- Education & Humanities
- Program Support
- Fellowships for Graduate Students, Dissertation work, Postdoctoral work and Travel Grants

SCIENCE AND MEDICAL

The Medical Foundation – A division of Health Resources in Action
Deadline: February 11, 2014
Amount: 2-year projects of $400,000; 1-year pilot studies of up to $150,000
The Klarman Family Foundation Grants Program in Eating Disorders Research has announced its 2014 Grant Cycle. The Program’s short-term goal is to support the most outstanding science and expand the pool of scientists whose research explores the basic biology of feeding, anorexia nervosa, bulimia nervosa, and/or binge eating disorder. The long-term goal is to improve the lives of patients suffering from these conditions. Examples of funding areas include but are not limited to: molecular genetic analysis of relevant neural circuit assembly and function; genetic and epigenetic research; animal models created by genetically altering neural circuits; testing of new chemical entities that might be used in animal models as exploratory treatments; and clinical trials involving medications or other non-psychotherapeutic interventions.

Simons Foundation – Origins of Life Investigator Award
Deadline: January 27, 2014
Amount: $100,000 – 400,000 per year for five years.
The Simons Collaboration on the Origins of Life is now accepting applications for Simons Investigator awards. The goal is to identify scientists conducting innovative research who either are or will be making the most important contributions to the origins-of-life field. Scientific productivity, creativity and risk in the design of experiments, and a commitment to collaborative origins research will be important factors in the selection process.

Iacocca Family Foundation – Type 1 Diabetes Research
Deadline: January 31, 2014
Amount: $10,000 - $500,000
In 2014, the foundation will support projects designed to directly accelerate a cure for type 1 diabetes or inform the understanding of the disease by a related or complementary mechanism of action. Investigators in traditional type 1 diabetes research, as well as investigators currently working on other autoimmune diseases, are encouraged to apply, provided that the proposed project focuses directly on type 1 diabetes and supports the mission of the foundation.

The Leukemia & Lymphoma Society - The Translational Research Program (TRP)
Deadline for Letter of Intent: February 15, 2014, 3:00pm ET
Full Application Due: March 1, 2014, 3:00pm ET
Amount: $200,000
TRP seeks bench-to-bedside fast track when it comes to finding better treatment and cures for leukemia, lymphoma and myeloma. (LLS) funds new and innovative research that shows high promise for translating basic biomedical knowledge to clinical application. The goal of translational research is to reduce the time between laboratory findings and actual treatment.
Avon Foundation – Research Grant Program
Amount: Up to $150,000, per year for 2 years; optional 3rd year may be sought during Year 2
Our Research Grant program funds translational research using clinical studies, human cell culture, epidemiologic and other progressive approaches to understand the causes of breast cancer, develop new tests that can track changes in healthy breast over time and develop new ways to prevent the disease. Funds also support developing new treatments for unmet needs such as treatments for metastatic, inflammatory and triple negative breast cancers.

The Charles H. Hood Foundation – Early Investigator Child Health Research Awards Program
Deadline: March 27, 2014, noon
Amount: Up to five $150,000 awards at $75,000 per year
Dedicated since 1942 to improve the health and quality of life for children throughout New England. Today’s research projects encompass many disciplines that have contributed to discoveries in pediatric medicine while launching the careers of promising junior faculty. The intent of the Award is to support newly independent faculty, provide the opportunity to demonstrate creativity, and assist in the transition to other sources of research funding. Research projects must be relevant to child health.

National Multiple Sclerosis Society - Barancik Prize for Innovation in MS Research
Deadline: January 31, 2014
Amount: $100,000
The Barancik Prize for Innovation in Multiple Sclerosis Research recognizes an exceptional scientist or a team of scientists whose work in MS research has demonstrated outstanding innovation and originality in scientific research relevant to MS. The committee will evaluate the impact and potential of the research to lead to pathways for the treatment and cure for MS and the scientific accomplishments that merit recognition as a future leader in MS research. This annual prize, made possible by the generosity of the Charles and Margery Barancik SO Foundation, is $100,000 to be used at the discretion of the recipient. Nominations must be submitted on behalf an individual, or team of individuals, by one or more colleagues or mentors. Self-nominations are not permitted.

The Harvey Prize – Technion – Israel Institute of Technology
Deadline: February 7, 2014
Amount: $75,000, two awards annually, must be nominated by Provost or Dean
The Harvey Prize is awarded annually in a variety of disciplines within the categories of Science & Technology and Human Health. Prospective candidates must be outstanding personalities in their fields and whose achievements have served as a source of inspiration to many others. The Harvey Prize is intended to recognize recent breakthroughs in science and technology. Work done in the past may be selected for the award if its significance has recently been appreciated. Winners are selected by a council of world-renowned scientists and experts in each field through a rigorous selection process. Laureates are requested to come to the Technion – Israel Institute of Technology to receive their awards. While in Israel, recipients give lectures and meet with Israeli scientists, academicians, and leaders at Technion and other universities. Material from these lectures is published in a continuing library, the Harvey Prize Papers.

Post-Polio Health International – (PHI) Through the fund, two annual grants for research are offered
Deadline: February 3, 2014
Amount: Up to $50,000 for one year; two year requests will be considered
- The Thomas Wallace Rogers Memorial Respiratory Research Grant supports research that investigates the management of neuromuscular respiratory insufficiency and explores historical, social, psychological, and independent living aspects of long-term home mechanical ventilation.
- The Post-Polioemyelitis Research Grant supports research that investigates the cause(s), treatment, and management of the late effects of polio and explores historical, social, psychological, and independent living aspects of living with polio.

World Anti-Doping Agency (WADA) – Research Grants
Deadline: February 16, 2014
Amount: $40,000 per year for 2-years; 15-30 grants awarded each year
WADA is committed to increasing the volume of research dedicated to developing new and improved detection methods for prohibited substances and methods. WADA is also responsible for studying emerging doping threats, such as gene doping. To this end, WADA issues a call for research proposals each year. Scientists from around the world submit proposals addressing the research topics prioritized by WADA’s Health, Medical and Research Committee.
United Leukodystrophy Foundation - CADASIL Research
Deadline: February 1, 2014
Amount: $25,000
The foundation is accepting applications to support research on cerebral autosomal dominant arteriopathy with subcortical infarcts and leukoencephalopathy (usually called CADASIL), which causes stroke and other impairments.

Interstitial Cystitis Association - 2014 Pilot Grants
Deadline: February 28, 2014
Amount: $25,000
The Interstitial Cystitis Association is accepting applications for its 2014 Pilot Research grant program, which funds novel and useful basic, clinical, or translational research studies that attempt to solve the many questions surrounding interstitial cystitis, a bladder condition that usually consists of multiple symptoms, including recurring pelvic pain, pressure or discomfort in the bladder and pelvic region, and urinary frequency and urgency. Specific areas of interest include but are not limited to epidemiology/burden of disease (especially in children), etiology of IC, serum or urine markers, treatment modalities, neurophysiology, pain management, pregnancy and IC, and diet and nutrition.

AAAS – American Association for the Advancement of Science, Early Career Investigator
Deadline for Letter of Application: March 1, 2014
Amount: $25,000
AAAS and Science Translational Medicine invite applications for the 2014 AAAS Martin and Rose Wachtel Cancer Research Award. This annual award, funded by an endowment established through a generous bequest from Martin L. Wachtel, will honor an early-career investigator who has performed outstanding work in the field of cancer research. Entrants must have received their Ph.D. or M.D. within the last 10 years. The award winner will be invited to deliver a public lecture on his or her research and their essay will be published as a Perspective in Science Translational Medicine.

SUSTAINABILITY
The Coca-Cola Foundation – Water Stewardship
Deadline: Accepts applications year-round
Amount: Varies greatly, higher ed institutions awarded $13,000 to over one million
The foundation supports programs designed to promote access to clean water and sanitation; watershed protection in water-stressed regions; utilization of water for production and/or multiple use systems that do more than provide clean water; and education and awareness programs designed to promote water conservation within communities and industry.

EDUCATION AND THE HUMANITIES
Russell Sage Foundation - Social Inequality Research
Deadline: January 31, 2014
Amount: Up to $200,000
For investigator-initiated research projects that broaden understanding of the causes and consequences of rising economic inequality in the United States. The foundation's program on Social Inequality supports research on the social, economic, political, and labor market consequences of rising economic inequality in the United States. The program seeks Letters of Inquiry for investigator-initiated research projects that will broaden understanding of the causes and consequences of rising economic inequalities. Priority will be given to projects that use innovative data or methodologies to address important questions related to inequality. Examples of the kinds of topics that are of interest include, but are not limited to, economic well-being, equality of opportunity, and intergenerational mobility; the political process and resulting policies; psychological and/or cultural change; education; labor markets; child development and child outcomes; neighborhoods and communities; families, family structure, and family formation; and other forms of inequality.

Coalition for Evidence-Based Policy - (CEPB) Seeks Letters of Intent for Domestic Policy-Related Low-cost Randomized Controlled Trials (RCT)
Deadline for Letters of Interest: February 14, 2014
Amount: Up to $100,000 each will be awarded to three RCTs.
CEPB, in partnership with the Laura and John Arnold Foundation and Annie E. Casey Foundation, has announced a grant competition for low-cost randomized controlled trials designed to build valid, actionable evidence about effective social spending in the United States. Demonstrating How Low-Cost Randomized Controlled Trials Can Drive Effective Social Spending is
a three-year initiative designed to demonstrate the feasibility and value of low-cost RCTs to a wide policy and philanthropic audience. In its first year, the competition will select and fund three low-cost RCTs that fall within any area of domestic social policy; however, at least one will be in an area affecting children and families. There will be two additional competitions in succeeding years. CEBP expects to fund a total of seven to nine low-cost RCTs over the course of the three years.

**Graham Foundation - Architectural Production and Presentation Grants**
**Deadline for Letters of Inquiry: February 25, 2014**
**Amount: In 2013, average grant $10,000 to forty projects**
The foundation has announced that it will be accepting Letters of Inquiry, beginning January 6, 2014, from organizations through its Production and Presentation grant program for projects that investigate the contemporary condition, broaden historical perspectives, and/or explore the future of architecture and the designed environment. Production and Presentation grants are designed to assist with the production and presentation of significant programs about architecture and the designed environment in order to promote dialogue, raise awareness, and develop new and wider audiences; support organizations to take risks in programming and create opportunities for experimentation; recognize the vital role organizations play in providing individuals with a public forum in which to present their work; and/or help organizations to realize projects that would otherwise not be possible without the foundation’s support. Grant amounts are determined by the scope of the project.

**Doris Duke Charitable Foundation – National Performing Arts Project**
**Deadline: February 28, 2014**
**Amount: Awards vary with size of project, $15,000 - $1,000,000+**
The Fund for National Projects supports projects that strengthen the national infrastructure of the professional nonprofit dance, jazz, presenting, and/or theatre fields. In addition, the Fund works to improve conditions for the national community of performing artists in the targeted fields. Grants are provided for projects that engage a broad national constituency, occur once (or periodically) rather than annually, and have the potential to significantly impact a field. Examples of eligible projects include research initiatives assessing the national health of arts groups or of individual artists, national convenings for performing arts fields (beyond traditional national annual conferences), and special projects that address unique circumstances that affect an entire professional nonprofit field. Projects by single performing arts entities are not supported.

**PROGRAM SUPPORT**

**Blackstone Charitable Foundation – Veterans Grants Program**
**Deadline: February 14, 2014**
**Amount: Ranges from $10,000 to $50,000**
The purpose is to target organizations that focus on veterans’ employment and professional development. Through the program, Blackstone will identify organizations and programs that directly support veterans and offer them the opportunity to build successful careers after their active service. Together with the training and support programs Blackstone is developing within its portfolio companies, the Veterans Grants Program is designed to help American veterans transition to private sector employment, adapt their skills, and succeed in new work environments.

**FELLOWSHIPS** *CFR cannot assist with grants and fellowships that are not funneled through OGCA. If you have trouble clarifying foundation requirements from the website, please contact CFR or OGCA staff to research funder requirements.*

**Chemical Heritage Foundation – Long-Term Fellowships, Short-Term Fellowships, Dissertation Fellowships, and Travel Grants**
**Deadline: February 15, 2014**
**Amount: $10,000 - $45,000**
**Travel Grants: No deadline; $750 a week**
The Beckman Center for the History of Chemistry at the Chemical Heritage Foundation, an independent research library in Philadelphia, is inviting applications for short or long term fellowships in the history of science, technology, medicine, and industry. Fellowships will be awarded to scholars to use the center’s extensive collections in the history of science, technology, medicine, and industry to pursue research projects. Projects funded in the past range from the history of Arabic alchemy and agricultural improvement to nanotechnology, pharmaceutical industry, and trans fats. Research proposals detailing the importance of CHF’s wide-ranging collections for the proposed project will be considered with particular care. Please read guidelines and FAQs carefully before submitting an application.

**Boren Awards for International Study – Graduate Fellowships**
**Deadline: January 28, 2014, 5:00 p.m.**
**Amount: Up to $30,000**
Boren Fellowships provide U.S. graduate students to add an important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency. Boren Fellowships support study and research in areas of the world that are critical to U.S. interests, including Africa, Asia, Central & Eastern Europe, Latin America, and the Middle East. Must be a US citizen.

The Chateaubriand Fellowship – Fellowship in Science, Technology, Engineering & Mathematics (STEM)
Deadline: January 31, 2014
Amount: $1,400 Euros per month for 4 to 9 months plus travel and health insurance coverage
Funding Period: September 1, 2014 – April 1, 2015
Offered by the Embassy of France in the United States, the Office for Science and Technology (OST), aims to initiate or reinforce collaborations, partnerships or joint projects (PUF, MIT-France, France-Chicago, France-Berkeley, France-Stanford projects, joint or international labs, etc.) by encouraging exchange at the doctoral level.
To that end, the Chateaubriand Fellowship supports PhD students registered in an American university who wish to conduct part of their doctoral research in a French laboratory. STEM Chateaubriand Fellows are selected through a merit-based competition and priority is given to candidates working toward a dual PhD degree (cotutelle) with their French host institution.

Corporate and Foundation Relations (CFR) can assist you in applying for non-governmental, institutional grant opportunities at the $25,000 level or greater. For all grant opportunities when funders require submitting as a 501c3 organization, we can arrange applying through the University of Massachusetts Foundation. This 501c3 process requires that all the finalized application materials (draft of the narrative is sufficient) be given to our CFR office four business days prior to the Office of Grants and Contracts Administration deadline. Most of the funding opportunities below are offered annually. If time does not permit applying now, we recommend putting them on your proposal schedule for next year. Funding opportunities included in this issue fall in these categories:

- Nursing & Public Health
- Science & Medical
- Education & Humanities
- Program Support
- Fellowships for Graduate Students, Dissertation work, Postdoctoral work and Travel Grants

NURSING AND PUBLIC HEALTH
Josiah Macy Jr. Foundation – Macy Faculty Scholars
Deadline: February 26, 2014
Amount: Five awards $100,000 per year for two years
The Foundation is looking for nursing and medical school faculty committed to careers in health professional education; have served for more than five years on the faculty of the sponsoring school, are innovators, and have shown promise as future leaders. One nomination by Dean, per school; visit link above for program brochure.

SCIENCE AND MEDICAL
The Medical Foundation – A division of Health Resources in Action
Deadline: February 11, 2014
Amount: 2-year projects of $400,000; 1-year pilot studies of up to $150,000
The Klarman Family Foundation Grants Program in Eating Disorders Research has announced its 2014 Grant Cycle. The Program’s short-term goal is to support the most outstanding science and expand the pool of scientists whose research explores
the basic biology of feeding, anorexia nervosa, bulimia nervosa, and/or binge eating disorder. The long-term goal is to improve the lives of patients suffering from these conditions. Examples of funding areas include but are not limited to: molecular genetic analysis of relevant neural circuit assembly and function; genetic and epigenetic research; animal models created by genetically altering neural circuits; testing of new chemical entities that might be used in animal models as exploratory treatments; and clinical trials involving medications or other non-psychotherapeutic interventions.

**Simons Foundation – Origins of Life Investigator Award**
*Deadline: January 27, 2014*
*Amount: $100,000 – 400,000 per year for five years.*
The Simons Collaboration on the Origins of Life is now accepting applications for Simons Investigator awards. The goal is to identify scientists conducting innovative research who either are or will be making the most important contributions to the origins-of-life field. Scientific productivity, creativity and risk in the design of experiments, and a commitment to collaborative origins research will be important factors in the selection process.

**Iacocca Family Foundation - Type 1 Diabetes Research**
*Deadline: January 31, 2014*
*Amount: $10,000 - $500,000*
In 2014, the foundation will support projects designed to directly accelerate a cure for type 1 diabetes or inform the understanding of the disease by a related or complementary mechanism of action. Investigators in traditional type 1 diabetes research, as well as investigators currently working on other autoimmune diseases, are encouraged to apply, provided that the proposed project focuses directly on type 1 diabetes and supports the mission of the foundation.

**The Leukemia & Lymphoma Society - The Translational Research Program (TRP)**
*Deadline for Letter of Intent: February 15, 2014, 3:00pm ET*
*Full Application Due: March 1, 2014, 3:00pm ET*
*Amount: $200,000*
TRP seeks bench-to-bedside fast track when it comes to finding better treatment and cures for leukemia, lymphoma and myeloma. (LLS) funds new and innovative research that shows high promise for translating basic biomedical knowledge to clinical application. The goal of translational research is to reduce the time between laboratory findings and actual treatment.

**Avon Foundation – Research Grant Program**
*Amount: Up to $150,000, per year for 2 years; optional 3rd year may be sought during Year 2*
Our Research Grant program funds translational research using clinical studies, human cell culture, epidemiologic and other progressive approaches to understand the causes of breast cancer, develop new tests that can track changes in healthy breast over time and develop new ways to prevent the disease. Funds also support developing new treatments for unmet needs such as treatments for metastatic, inflammatory and triple negative breast cancers.

**The Charles H. Hood Foundation – Early Investigator Child Health Research Awards Program**
*Deadline: March 27, 2014, noon*
*Amount: Up to five $150,000 awards at $75,000 per year*
Dedicated since 1942 to improve the health and quality of life for children throughout New England. Today's research projects encompass many disciplines that have contributed to discoveries in pediatric medicine while launching the careers of promising junior faculty. The intent of the Award is to support newly independent faculty, provide the opportunity to demonstrate creativity, and assist in the transition to other sources of research funding. Research projects must be relevant to child health.

**National Multiple Sclerosis Society - Barancik Prize for Innovation in MS Research**
*Deadline: January 31, 2014*
*Amount: $100,000*
The Barancik Prize for Innovation in Multiple Sclerosis Research recognizes an exceptional scientist or a team of scientists whose work in MS research has demonstrated outstanding innovation and originality in scientific research relevant to MS. The committee will evaluate the impact and potential of the research to lead to pathways for the treatment and cure for MS and the scientific accomplishments that merit recognition as a future leader in MS research. This annual prize, made possible by the generosity of the Charles and Margery Barancik SO Foundation, is $100,000 to be used at the discretion of the recipient. Nominations must be submitted on behalf an individual, or team of individuals, by one or more colleagues or mentors. Self-nominations are not permitted.
The Harvey Prize – Technion – Israel Institute of Technology
Deadline: February 7, 2014
Amount: $75,000, two awards annually, must be nominated by Provost or Dean
The Harvey Prize is awarded annually in a variety of disciplines within the categories of Science & Technology and Human Health. Prospective candidates must be outstanding personalities in their fields and whose achievements have served as a source of inspiration to many others. The Harvey Prize is intended to recognize recent breakthroughs in science and technology. Work done in the past may be selected for the award if its significance has recently been appreciated. Winners are selected by a council of world-renowned scientists and experts in each field through a rigorous selection process. Laureates are requested to come to the Technion – Israel Institute of Technology to receive their awards. While in Israel, recipients give lectures and meet with Israeli scientists, academicians, and leaders at Technion and other universities. Material from these lectures is published in a continuing library, the Harvey Prize Papers.

Post-Polio Health International – (PHI) Through the fund, two annual grants for research are offered
Deadline: February 3, 2014
Amount: Up to $50,000 for one year; two year requests will be considered
- The Thomas Wallace Rogers Memorial Respiratory Research Grant supports research that investigates the management of neuromuscular respiratory insufficiency and explores historical, social, psychological, and independent living aspects of long-term home mechanical ventilation.
- The Post-Polioymelitis Research Grant supports research that investigates the cause(s), treatment, and management of the late effects of polio and explores historical, social, psychological, and independent living aspects of living with polio.

World Anti-Doping Agency (WADA) – Research Grants
Deadline: February 16, 2014
Amount: $40,000 per year for 2-years; 15-30 grants awarded each year
WADA is committed to increasing the volume of research dedicated to developing new and improved detection methods for prohibited substances and methods. WADA is also responsible for studying emerging doping threats, such as gene doping. To this end, WADA issues a call for research proposals each year. Scientists from around the world submit proposals addressing the research topics prioritized by WADA’s Health, Medical and Research Committee.

United Leukodystrophy Foundation - CADASIL Research
Deadline: February 1, 2014
Amount: $25,000
The foundation is accepting applications to support research on cerebral autosomal dominant arteriopathy with subcortical infarcts and leukoencephalopathy (usually called CADASIL), which causes stroke and other impairments.

Interstitial Cystitis Association - 2014 Pilot Grants
Deadline: February 28, 2014
Amount: $25,000
The Interstitial Cystitis Association is accepting applications for its 2014 Pilot Research grant program, which funds novel and useful basic, clinical, or translational research studies that attempt to solve the many questions surrounding interstitial cystitis, a bladder condition that usually consists of multiple symptoms, including recurring pelvic pain, pressure or discomfort in the bladder and pelvic region, and urinary frequency and urgency. Specific areas of interest include but are not limited to epidemiology/burden of disease (especially in children), etiology of IC, serum or urine markers, treatment modalities, neurophysiology, pain management, pregnancy and IC, and diet and nutrition.

AAAS – American Association for the Advancement of Science, Early Career Investigator
Deadline for Letter of Application: March 1, 2014
Amount: $25,000
AAAS and Science Translational Medicine invite applications for the 2014 AAAS Martin and Rose Wachtel Cancer Research Award. This annual award, funded by an endowment established through a generous bequest from Martin L. Wachtel, will honor an early-career investigator who has performed outstanding work in the field of cancer research. Entrants must have received their Ph.D. or M.D. within the last 10 years. The award winner will be invited to deliver a public lecture on his or her research and their essay will be published as a Perspective in Science Translational Medicine.

SUSTAINABILITY
The Coca-Cola Foundation – Water Stewardship
Deadline: Accepts applications year-round  
Amount: Varies greatly, higher ed institutions awarded $13,000 to over one million  
The foundation supports programs designed to promote access to clean water and sanitation; watershed protection in water-stressed regions; utilization of water for production and/or multiple use systems that do more than provide clean water; and education and awareness programs designed to promote water conservation within communities and industry.

**EDUCATION AND THE HUMANITIES**

- **Russell Sage Foundation** - Social Inequality Research  
  Deadline: January 31, 2014  
  Amount: Up to $200,000  
  For investigator-initiated research projects that broaden understanding of the causes and consequences of rising economic inequality in the United States. The foundation's program on Social Inequality supports research on the social, economic, political, and labor market consequences of rising economic inequality in the United States. The program seeks Letters of Inquiry for investigator-initiated research projects that will broaden understanding of the causes and consequences of rising economic inequalities. Priority will be given to projects that use innovative data or methodologies to address important questions related to inequality. Examples of the kinds of topics that are of interest include, but are not limited to, economic well-being, equality of opportunity, and intergenerational mobility; the political process and resulting policies; psychological and/or cultural change; education; labor markets; child development and child outcomes; neighborhoods and communities; families, family structure, and family formation; and other forms of inequality.

- **Coalition for Evidence-Based Policy** - (CEPB) Seeks Letters of Intent for Domestic Policy-Related Low-cost Randomized Controlled Trials (RCT)  
  Deadline for Letters of Interest: February 14, 2014  
  Amount: Up to $100,000 each will be awarded to three RCTs.  
  CEBP, in partnership with the Laura and John Arnold Foundation and Annie E. Casey Foundation, has announced a grant competition for low-cost randomized controlled trials designed to build valid, actionable evidence about effective social spending in the United States. Demonstrating How Low-Cost Randomized Controlled Trials Can Drive Effective Social Spending is a three-year initiative designed to demonstrate the feasibility and value of low-cost RCTs to a wide policy and philanthropic audience. In its first year, the competition will select and fund three low-cost RCTs that fall within any area of domestic social policy; however, at least one will be in an area affecting children and families. There will be two additional competitions in succeeding years. CEBP expects to fund a total of seven to nine low-cost RCTs over the course of the three years.

- **Doris Duke Charitable Foundation** – National Performing Arts Project  
  Deadline: February 28, 2014  
  Amount: Awards vary with size of project, $15,000 - $1,000,000+  
  The Fund for National Projects supports projects that strengthen the national infrastructure of the professional nonprofit dance, jazz, presenting, and/or theatre fields. In addition, the Fund works to improve conditions for the national community of performing artists in the targeted fields. Grants are provided for projects that engage a broad national constituency, occur once (or periodically) rather than annually, and have the potential to significantly impact a field. Examples of eligible projects include research initiatives assessing the national health of arts groups or of individual artists, national convenings for performing arts fields (beyond traditional national annual conferences), and special projects that address unique circumstances that affect an entire professional nonprofit field. Projects by single performing arts entities are not supported.

- **The Camille & Henry Dreyfus Foundation** - Teacher-Scholar Awards Program  
  Deadline: February 10, 2014  
  Amount: $75,000  
  Supports the research and teaching careers of talented young faculty in the chemical sciences. Based on institutional nominations, the program provides discretionary funding to faculty at an early stage in their careers. Criteria for selection include an independent body of scholarship attained within the first five years of their appointment as independent researchers, and a demonstrated commitment to education, signaling the promise of continuing outstanding contributions to both research and teaching.

- **Graham Foundation** - Architectural Production and Presentation Grants  
  Deadline for Letters of Inquiry: February 25, 2014
Amount: In 2013, average grant $10,000 to forty projects
The foundation has announced that it will be accepting Letters of Inquiry, beginning January 6, 2014, from organizations through its Production and Presentation grant program for projects that investigate the contemporary condition, broaden historical perspectives, and/or explore the future of architecture and the designed environment. Production and Presentation grants are designed to assist with the production and presentation of significant programs about architecture and the designed environment in order to promote dialogue, raise awareness, and develop new and wider audiences; support organizations to take risks in programming and create opportunities for experimentation; recognize the vital role organizations play in providing individuals with a public forum in which to present their work; and/or help organizations to realize projects that would otherwise not be possible without the foundation’s support. Grant amounts are determined by the scope of the project.

PROGRAM SUPPORT

Blackstone Charitable Foundation – Veterans Grants Program
Deadline: February 14, 2014
Amount: Ranges from $10,000 to $50,000
The purpose is to target organizations that focus on veterans’ employment and professional development. Through the program, Blackstone will identify organizations and programs that directly support veterans and offer them the opportunity to build successful careers after their active service. Together with the training and support programs Blackstone is developing within its portfolio companies, the Veterans Grants Program is designed to help American veterans transition to private sector employment, adapt their skills, and succeed in new work environments.

FELLOWSHIPS

*CFR cannot assist with grants and fellowships that are not funneled through OGCA. If you have trouble clarifying foundation requirements from the website, please contact CFR or OGCA staff to research funder requirements.

Chemical Heritage Foundation – Long-Term Fellowships, Short-Term Fellowships, Dissertation Fellowships, and Travel Grants
Deadline: February 15, 2014
Amount: $10,000 - $45,000
Travel Grants: No deadline; $750 a week
The Beckman Center for the History of Chemistry at the Chemical Heritage Foundation, an independent research library in Philadelphia, is inviting applications for short or long term fellowships in the history of science, technology, medicine, and industry. Fellowships will be awarded to scholars to use the center’s extensive collections in the history of science, technology, medicine, and industry to pursue research projects. Projects funded in the past range from the history of Arabic alchemy and agricultural improvement to nanotechnology, pharmaceutical industry, and trans fats. Research proposals detailing the importance of CHF’s wide-ranging collections for the proposed project will be considered with particular care. Please read guidelines and FAQs carefully before submitting an application.

Boren Awards for International Study – Graduate Fellowships
Deadline: January 28, 2014, 5:00 p.m.
Amount: Up to $30,000
Boren Fellowships provide U.S. graduate students to add an important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency. Boren Fellowships support study and research in areas of the world that are critical to U.S. interests, including Africa, Asia, Central & Eastern Europe, Latin America, and the Middle East. Must be a US citizen.

The Chateaubriand Fellowship – Fellowship in Science, Technology, Engineering & Mathematics (STEM)
Deadline: January 31, 2014
Amount: $1,400 Euros per month for 4 to 9 months plus travel and health insurance coverage
Funding Period: September 1, 2014 – April 1, 2015
Offered by the Embassy of France in the United States, the Office for Science and Technology (OST), aims to initiate or reinforce collaborations, partnerships or joint projects (PUF, MIT-France, France-Chicago, France-Berkeley, France-Stanford projects, joint or international labs, etc.) by encouraging exchange at the doctoral level.
To that end, the Chateaubriand Fellowship supports PhD students registered in an American university who wish to conduct part of their doctoral research in a French laboratory. STEM Chateaubriand Fellows are selected through a merit-based competition and priority is given to candidates working toward a dual PhD degree (cotutelle) with their French host institution.
