The theme for this forthcoming special issue focuses on the possibilities and tensions of applying social justice frameworks to the field of education finance. As the research literature in social justice education continues to expand in its influence, the work often has surfaced critical resource implications that necessitate methodological improvements in conceptualizations and systematic analyses. Therefore, there is an increasing need to create forums for dialogue among scholars, practitioners, and advocates who can illuminate the social justice implications for elementary, secondary, and higher education finance, economics of education, and resource allocation issues.

This special issue offers an opportunity to examine a variety of analytical challenges that arise as social justice frameworks are applied to education finance and economic issues. Within the scope of this special issue, we strongly encourage an effort to understand the interconnectedness of the theoretical, practical, and advocacy work that is required to advance a social justice perspective in K-16 education today. Submissions may cover, but need not be limited to, the following topics or analytical approaches:

- **Contrasting perspectives:** Outlining differences in social justice perspectives among constituents of education and the implications for conceptualizing the tensions and possibilities of social justice and education finance;

- **Empirical inquiries:** Case studies or large-scale studies of the impact of school finance, higher education finance, student financial aid and other similar policies on communities of color, low-income students, women, immigrant students, or other marginalized groups in education; Case studies of schools or districts or college campuses that employ a social justice approach to allocating resources to support student learning (or other relevant educational aims); Analyses of the democratic involvement of constituents, for example, in formulating school budgets, responding to changes in student fees, etc. and the challenge of institutional barriers, lack of access to information, and/or lack of transparency in institutional systems and processes;

- **Historical inquiries:** Surfacing longstanding patterns of inequity in school finance that produce certain social justice implications.

- **Policy inquiries:** Analyses of the institutional biases that exist within various K-16 funding distribution systems and their impact on different student populations.

Theoretical inquiries: Examinations from a variety of critical perspectives (e.g., critical race theory, feminist theory, social reproduction theory) and/or disciplinary approaches to illuminate the important linkages that exist between education finance and social justice.

Diverse conceptual, methodological, and empirical work is encouraged. Manuscripts may focus on any subset of the K-16 educational system.

**Submission Guidelines:**

*Equity & Excellence in Education* is a peer-reviewed quarterly journal with an audience of K-16 educators, administrators, and researchers, edited by Maurianne Adams, Professor of Education. Finished manuscripts must be submitted by **May 1, 2008**. Total page length should not exceed approximately 25 double-spaced pages. HARVARD GRADUATE SCHOOL OF EDUCATION
STUDENT RESEARCH CONFERENCE (SRC)

The Harvard Graduate School of Education Student Research Conference will be held on March 14, 2008. The HGSE Student Research Conference is a student-run conference designed to provide professional development for presenters who will gain valuable insights from Harvard faculty and colleagues into how to enhance their own research. The call for proposals will be on the SRC website www.hgse-src2008.org starting on November 26, 2007.

This year's theme is: "The Power of Educational Research: Translating Knowledge into Action."

- How can we focus our research so it impacts the lives of students, teachers, schools and communities?
- How can we, as the next generation of educational researchers, create work that brings together research, policy and practice?
- Finally, and perhaps most importantly, how do we use our work to generate meaningful and positive social change?

Are you working to create a new curriculum or technological intervention in order to make a difference for kids? Are you focusing on how children learn? Are you studying international or domestic issues on systemic school reform? Are you hoping to mobilize families and communities to reform education? All of these represent ways in which educational research can be translated into action and all (and more) are topics on which you can present at this year's SRC!

In the meantime, please sign up for our mailing list and continue to check the website for updates on proposal submission, training sessions and other conference-related announcements. For further information email: tri-chairs@hgse-src2008.org

The library system offers a variety of resources and services to support graduate studies and research through collections stored in the 28-story W.E.B. Du Bois Library, the Integrated Sciences and Engineering Library, and the Music Reserve Lab. The W.E.B. Du Bois Library houses materials in the social sciences and the humanities as well as the Government Documents and Patents Collection, the Map Collection, and Special Collections and Archives.
