MARLINA DUNCAN  Proposed Dissertation Title: “The Cultural Socialization Process of Veteran Urban Secondary Science Teachers.” Statement of the Problem: Many new science teachers will need to take positions in urban schools without working with effective teachers of diverse urban students prior to taking these positions. With little or no exposure to successful secondary teachers of urban youth, either as student teachers or through an examination of current research which rarely focuses on a single secondary content area, prospective teachers will find it difficult to learn how to negotiate the cultural contexts of the teaching profession. Therefore it is essential for science educators to begin to examine the cultural contexts of urban science teaching to help understand how to support the personal and professional well being of novice STEM educators. A current demand for increasing and retaining the supply of quality educators, administrators, and policy makers reinforces the need for this type of research. Chairperson: Dr. Allan Feldman.

KATE HUDSON  Proposed Dissertation Title: “Academic Technology: Fostering Collaborations Across Organizational Boundaries.” Statement of the Problem: Effective use of information technology on campuses increasingly requires collaboration across different groups as the lines between the roles of the library, centers for teaching, continuing education and other groups continue to blur. Despite widespread agreement on the important of collaborations for IT in general and academic technology in particular, there are substantial challenges to achieving suc-

(continued on page 2)
cessful collaborations, and there has been little research focusing on the conditions that promote and enhance effective collaborations. In order for academic technology to achieve its potential for improving teaching and learning in higher education, it is crucial that we better understand how institutions can develop and support effective collaborations in academic technology. Chairperson: Dr. Joseph B. Berger.

JEAN KOSHA Proposed Dissertation Title: "Somali Newcomers: How language, culture, and school experiences shape identity." Statement of the Problem: A large number of Somali refugees, nearly 13,000, have resettle in the United States since 1999. It is vital to understand who these newcomers are, what they bring to the school and the experiences of the second language learners in the U.S. school system. The interaction of the home culture and school culture will influence the identity development of the young Somali learners. With a deeper understanding of how language, culture and experiences in school shape these learners' identities, educators will then be better able to serve the needs of the Somali children and their families while fostering their success in their new communities. Chairperson: Dr. David R. Evans.

INTERNATIONAL PROGRAMS OFFICE (IPO) TUITION WAIVERS FOR SPRING, 2009

*NEW* Nominations for tuition waivers for current and new international graduate students are now being solicited by the International Programs office.
