ENCOURAGING OUTSTANDING FACULTY
D. JULIAN MCCLEMENTS
Distinguished Professor in Food Science

JULIAN MCCLEMENTS CHANNELS HIS PASSION AND HIS FASCINATION WITH MATH, PHYSICS, AND CHEMISTRY INTO IMPROVING THE QUALITY, SAFETY, AND HEALTH OF THE WORLD’S FOOD SUPPLY.

WHY DOES MCCLEMENTS CHANNEL THIS PASSION INTO FOOD SCIENCE?
On one hand, there is great need worldwide: “There are growing problems in the world in both food security and in aging populations. Food scientists can help to develop more sustainable processing operations, reduce waste, and develop healthier and more nutritious foods.”

On the other, food is simply a fascinating subject for a scientist like McClements: “Foods are extremely complex and dynamic multicomponent materials and are therefore very challenging to work with, which always makes the work stimulating.”

SEVEN UMASS AMHERST FACULTY MEMBERS—INCLUDING JULIAN MCCLEMENTS—ARE NAMED AMONG “THE WORLD’S LEADING SCIENTIFIC MINDS.” ACCORDING TO A 2016 SURVEY BY THOMSON REUTERS.

A RECORD YEAR FOR THE ENDOWMENT
As the permanent capital of the university, the endowment provides a steady stream of income and allows for important investments in program excellence. These resources also advance the values and priorities of donors in perpetuity. The endowment return was +12.5 percent for this fiscal year. The total value of the endowment climbed from $734 million to a record high of $820 million. The UMass Amherst campus endowment increased from $287 million to $323.75 million.
