Popular Science Writing Panel
Friday, March 10

If you plan to engage in popular science writing, or are considering a career in science communication, we have just the event for you!

Please join the Graduate School Office of Professional Development and That's Life [Science] for a panel featuring popular science writing professionals whose many accomplishments include working for NPR, Nature, and The Huffington Post.

Among other topics, we will discuss effective popular science writing, difficulties of writing for the public gaze, and the realities of being a professional science communicator.

**Featured Speakers:**

**Maggie Villiger** – Maggie is a science and technology editor at The Conversation. Maggie has a background in broadcast journalism, having worked in both public radio and television (fmi: https://theconversation.com/us/team).

**Alla Katsnelson** – Alla is a freelance science writer and editor who completed her doctorate on mammalian brain development and has written for publications such as Nature, The Guardian, and The Scientist (fmi: https://allakatsnelson.com/about/).

**Rosemary Mosco** – Well-known for her Bird and Moon cartoons, Rosemary uses art and humor to communicate science and has contributed to The Huffington Post, IFLS, and many more (fmi: http://rosemarymosco.com).

**Event Details:**

Time: Mar. 10, 2017 from 11:00am - 12:15pm
