

# Fábos International Conference on Landscape and Greenway Planning 2010

July 8-11. 2010. in Budapest, HUNGARY

Organized by: University of Massachusetts Amherst and Corvinus University of Budapest

The Fábos International Conference on Landscape and Greenway Planning is held every three years to bring together experts who are influencing landscape planning, policy making and greenway planning from the local to international level. It is intended to highlight recent trends and expand the literature about landscape and greenway planning. The aim is to explore how landscape architects and planners from different countries have approached greenway planning and to understand how greenways have been tailored to each country's unique geographical, cultural, and political circumstances.

## PLANNING FOR CHANGE:

The world is in a state of social, economic, political, and ecological change. From global climate change to urbanization, planners and landscape architects are grappling with unprecedented change as they respond to growing demand for limited resources. This theme underlies each of this year's Fábos Conference topic areas:

**Greenway Planning:** Planning for linear corridors has occurred across multiple scales — national, state or province, and municipal. This track will cover innovations in greenway planning that span research, policy, and practice with a focus on cultural landscape planning, recreational, and ecological corridors.

**Landscape Planning:** Planning for new land uses while protecting ecological integrity and ecosystems is the theme for landscape planning. This includes green infrastructure, ecological networks, and urban planning solutions.

**Landscape Design:** An important aspect of planning is the final design and implementation of landscapes along a corridor. This topic area includes park design, urban plazas, historic sites, and other site scale solutions that incorporate the larger planning context.

## Keynote speakers:

**Dr. Julius Gy. Fábos:** Professor Emeritus, University of Massachusetts Amherst

**Dr. M. Teresa L. Andresen:** Professor, University of Porto, Portugal

**Dr. Attila Csemez:** Dean, Professor, Corvinus University of Budapest, Hungary

**Dr. Jack Ahern:** Professor, University of Massachusetts Amherst

## Call for Abstracts

Original, unpublished abstracts and papers focusing on one of the conference topics above can be submitted. Presentations will be accepted both in oral paper presentation and in poster presentation format. Extended abstracts (max. 2 pages & min. 500 words) can be submitted via the conference web-based system at [fabos.uni-corvinus.hu](http://fabos.uni-corvinus.hu) until the 15th of November, 2009.

## Schedule of activities till the conference:

25th of September 2009

15th of November 2009

15th of December 2009

20th of February 2010

30th of April 2010

Opening date for uploading abstracts to webpage

Deadline for submitting abstracts to webpage

Letter of abstract paper acceptance by committee

Full paper (6-8 pages) due

Final deadline for participant fee transfer

## Preliminary conference program

8-9th of July 2010

10th of July 2010

11th of July 2010

Conference in Budapest, Plenary and Sessions

Scientific excursions – regional greenways

Field-trips
