Fall 2010 Course Descriptions

Roles and Responsibilities of Planning & Zoning Boards, Part 1

For new board members or building inspectors. This program will launch you into your role as a local official, introduce you to the functions of the two boards and the main tools of planning and zoning.

Roles and Responsibilities of Planning & Zoning Boards, Part 2

This session is designed to discuss more advanced topics for new board members or building inspectors. It will focus on the Open Meeting, Public Records, and Conflict of Interest Laws.

Introduction to the Zoning Act

For newer board members, this course addresses the history and purposes of zoning, adoption of zoning bylaws, variances and special permits, public hearing and voting requirements and other key procedural requirements.

Writing Reasonable and Defensible Decisions

Covers some key points that will assist boards in writing clear and defensible decisions. It describes criteria that should be contained in local zoning regulations and how these regulations relate to the types of conditions a board may impose when approving a special permit or variance application.

Introduction to the Subdivision Control Law and ANR

Addresses the purposes of the Subdivision Control Law; important procedural requirements and board responsibilities when reviewing subdivision and ANR plans; adoption of subdivision regulations; review of ANR plans; access issues; preliminary and definitive plans; Planning Board waivers; modifying, amending and rescinding plans; enforcement; vested rights and zoning freezes.

How to Hold A Perfect Public Hearing

Covers legal and procedural requirements for conducting a public hearing. It also contains video clips to assist boards in avoiding constructive approvals, easing tension between parties over controversial projects and calming chaotic hearings.

Reading a Subdivision Plan

Explains how topography, roads, lot lines, wetlands, drainage and utilities etc are delineated on a plan. Aids boards with the decision-making and negotiating process.

NEW Planning Locally for Affordable Housing Strategies

Many communities struggle with the issue of affordable housing. This session will highlight various zoning initiatives and planning mechanisms designed to increase the local supply of affordable housing. Topics will include how to create a housing plan, implementation strategies, and innovative zoning tools designed to increase housing affordability for area residents.

AICP credit! This workshop has been submitted for AICP credit. Credit pending AICP confirmation.

Site Plan Review

The Zoning Act does not contain any provisions for the review of site plans, however the process can be a very effective tool for a board to review the details, aesthetics and impacts of a potential project. This course explains the difference between site plan approval and special permits; the review process; the types of conditions a board may impose; reasons for disapproval; the appeal process and the types of information a town can require to be shown on a site plan.

Vested Rights and Nonconforming Structures and Uses

Clarifies the difference between a nonconforming structure, lot and use. Explains the difference between a nonconforming and a noncompliant structure; familiarizes board members with issues regarding alterations to nonconforming structures or uses. Describes separate and common protection, as well as vested rights for subdivision and ANR plans.

Creating Master Plans

Local officials will learn why and how to prepare, adopt, and implement the master or comprehensive plan described in MGL Chapter 41, Section D. The session will identify the sections of a master/comprehensive plan and specific steps for carrying out the plan.
