QUEST

At UMass
Amherst

October 24, 2015
Integrated Science Building
661 North Pleasant St.
UMass Amherst

Science Quest is an exciting opportunity for 10-12 graders to visit the UMass campus and learn about science topics through hands-on activities, demonstrations, and lab tours. Take a physics lab tour to see how nanoscale devices and materials are made, or how cell phones can be smarter still with providing information on your health and surroundings. Or, learn how to make a solar cell from everyday household materials; how starches interact and form gels; how to make ice cream with liquid nitrogen; or how to turn peanut butter into powder!

A panel of UMass undergraduate science students will discuss what it is like to be a science major at UMass, and a UMass admissions representative will speak about admissions requirements and preparation for college.

Students may attend on their own, with a parent, or as part of a school group with a teacher. Teachers are welcome to bring their classes to Science Quest for a field trip.

Space is limited so register today!
