## Abstract

Providing a safe driving environment and implementing safety improvements at the local level can pose significant challenges for municipal governments. Similar to challenges faced by federal and state agencies, financial and personnel limitation can make it difficult for local agencies to develop and implement safety initiatives. Information is available to help local governments identify options and develop action plans for implementing safety measures.

The purpose of this Traffic Safety Toolbox is to provide a resource of information for municipal practitioners. Specifically, the series of fact sheets provide guidance and information regarding selected traffic safety and engineering topics. These fact sheets provide information about valuable resources, including links to web pages as applicable. The fact sheets are presented in this Final Report and are available online at www.mass.gov/mhd/safetytoolbox.

## Key Word

Traffic Safety, Maintenance, Safety Countermeasures
