The course will center on the close study of several works that are part of the established canon of Western art music. The main text for this course will be Douglas Seaton, Ideas and Styles in the Western Musical Tradition (New York: Oxford University Press, 2010). We will also draw on the source readings in Piero Weiss and Richard Taruskin, ed., Music and the Western World (New York: Schirmer, 1984).

MUS 643: Seminar in 19th Century Music, (3 credits)  Ritchey
May be used for Common Core History Requirement
Mon. 5:30 – 8:00 p.m., FAC Rm 157

Romanticism was a literary, artistic, cultural, and musical movement characterized by a reaction to the rationality and objectivity of the Enlightenment Period. As emphasis on the subjective and individual experience rose in importance, so did metaphorical ideals, the elevation of art for its own sake, and an idealization of untamed nature. Central to the Romantic Zeitgeist was an emphasis on the individual, the “I.” Taking “the individual” as its main theme, this course explores the many varied ways this theme played out in art, literature, and especially music, in terms of genre, form, harmonic language, and the roles of the performer and composer. Autobiography, virtuosity, originality, and authority of the narrative voice, are just a few of the topics that will be covered in relation to the music of Franz Schubert, Robert Schumann, Franz Liszt, Richard Wagner, and other figures.
The course aims to present both a survey of the major genres, forms, and styles associated with Romanticism, as well as more detailed explorations of the individualized ways composers assimilated and exhibited Romantic traits in their compositions or performances. It also aims to help students think critically about how the Romantic Zeitgeist fits into the larger trajectory of music history. The required textbooks for the course are Richard Taruskin’s *The Oxford History of Western Music*, vol. 3: The Nineteenth Century and *Strunk’s Source Readings in Music History*, rev. ed., Vol. 6. N.Y.: W.W. Norton and Co., 1997. Each student will prepare a final paper (10-15 pages) or other creative project and participate in weekly readings and score study.

Assignments will include reading, listening, viewing and a seminar project (12-15 page paper, or equivalent composition or performance project). The readings will be selected from Kyle Gann’s, *American Music in the 20th Century* (2007) and volume 5 of Richard Taruskin’s *Oxford History of Western Music* (2005), plus supplementary articles distributed in class; listening and viewing will be on reserve in the Listening Lab. This seminar will provide a forum for the development of musicological “craft;” exposure to a broad spectrum of “genres” of musicology; discussion of foreign language issues, as appropriate to research areas; discussion of interdisciplinary issues, as appropriate to research areas; exploration of potential MM thesis topics; creation of an annotated bibliography on a potential thesis topic; creation of a research report on a potential thesis topic; creation of a prospectus for a thesis; and progress towards admission to an appropriate doctoral program or other career objective.

Readings will provide examples of traditional historical musicology as well as applications to wider repertoires and broader currents, such as criticism, interdisciplinary musicology, and theoretical issues. Readings will normally be limited to approximately 80 pages per week. Students will (a) engage the readings and participate
actively in the discussions; (b) create weekly 1-2-page critical response papers; and (c) lay the foundations for a research project which could evolve into an MM thesis, including a research report and a prospectus. The text will be Alistair Williams, *Constructing Musicology* (Burlington, 2001), plus other readings that will be provided. Students will be evaluated based on their progress in relation to the course objectives listed above (50%) and on their written work (50%).

**MUS 644: Seminar on Music of the 20\textsuperscript{th} Century (“Neoclassicisms in Music”) (3 credits)**  
*Knyt*  
May be used for Common Core History Requirement  
Mon / Wed 4:45-6:00 pm., FAC Rm 157

Musical neoclassicism has been succinctly described as a style of composition between the two world wars characterized by objectivity and a reference to forms and idioms of the eighteenth century. Igor Stravinsky’s compositions of the 1920s have been held as classic examples. However, there were many diverse manifestations; trends crossed national borders and extended back into the late nineteenth century. There was no single neoclassical style. Some compositions are more retrospective in their neo-tonality, simplicity, and quotation. Others allude to past forms while looking forward to new methods of tonal organization or unconventional harmonies. This course aims to present a more nuanced vision of musical neoclassicism that takes into account geographic, temporal, and individual variations, as well as intersections with the other arts and culture. Through analyses of compositions, ballets, and visual art by neoclassicists in France, Germany, Russia, and Italy, it will scrutinize national and individual differences between music produced by *Les Six*, the *generazione dell’ottanta*, and other central figures, such as Stravinsky, Sergei Prokofiev, Arnold Schoenberg, Alfredo Casella, Ferruccio Busoni, and Paul Hindemith. It seeks to expose a complex of musical styles whose extended temporal and geographic boundaries form part of a broad and overarching neoclassical movement. Prerequisite: MUSIC 301.

**Music 646: Seminar on Renaissance Music (3 credits)**  
*Rodgers*  
May be used for Common Core History Requirement  
Tue / Thu 9:30-10:45 am, FAC Rm 157

**Music 648: Music History Pedagogy (3 credits)**  
*Knyt*  
May be used for Common Core History Requirement,  
Mon / Wed 6:15-7:30, FAC Rm 157

This is a course for graduate students in all concentration areas. Studying—and even becoming expert in—a subject does not necessarily prepare one to teach that subject to others. However, most graduate students in a wide variety of majors will be expected to teach music history at some point in their careers. This course will provide an opportunity to think about and practice different methods and approaches for teaching music history to students with different musical backgrounds. Throughout the semester, we will read philosophical, theoretical, and practical essays about different facets of teaching; critique and design syllabi and course descriptions; survey textbooks; talk through specific challenges and concerns; and design creative approaches to teaching particular pieces, issues, or eras. There will also be a professional development component to this class—for example, near the end of the semester we will talk about ways to present teaching philosophies in job applications.

Each chamber group meets a minimum of 50 minutes per week with their faculty or graduate teaching assistant coach and 50 minutes per week on their own. In an effort to make space available for chamber rehearsals, Tuesday and Thursday 12–12:50 have been designated as chamber music hours and rooms have been set aside in the schedule for this purpose. Students and faculty may reserve a room for their coached and uncoached sessions by arrangement with the Facilities Manager at the beginning of each semester. Chamber music ensembles receiving credit under MUSIC 551-553 or MUSIC 593C must perform at least once on a studio recital, a Tuesday Morning Recital, a University evening concert, or a public off-campus concert.
SPECIAL TOPICS and INDEPENDENT STUDY
