Undergraduate Program Assessment

School of Nursing

Student Learning Objectives
The undergraduate program provides the knowledge and skills fundamental to professional nursing. Students emerge from this community-based program prepared for graduate study and able to:

- Develop and sustain therapeutic and collaborative relationships that enhance health and healing.
- Use assessment, communication, and technical skills to design, manage, and coordinate nursing care of clients in the context of environment.
- Use critical thinking in creative problem solving and decision-making to provide competent nursing care to clients in the context of resources, current technologies, and outcome-based practice models.
- Provide culturally competent nursing care to clients with diverse backgrounds.
- Provide safe, competent nursing care to clients using the essential processes to promote, maintain and restore health and prevent illness within the context of environment.
- Design, manage and coordinate nursing care of clients in collaboration with the interdisciplinary health care team using knowledge of health care systems and policy and global health care concerns.
- Advocate for client, nurse, and profession incorporating ethical theory and professional values of altruism, human dignity, integrity, and social justice.
- Assume the role of the professional nurse, valuing lifelong learning, continued professional growth and commitment to excellence.

Assessment tools
- Indirect: faculty end of course evaluations, student end of course evaluations, and SRTIs; School of Nursing Systematic Evaluation Plan; exit interviews.
