## XII. Special Academic Programs

*The Commonwealth College*, an honors college, offers a dynamic curriculum, such as interdisciplinary seminars, enriched honors courses, and opportunities to link academics and community outreach. Commonwealth College resources include special housing opportunities, a computer laboratory, and academic support services, such as the Office of National Scholarship Advisement which assists students applying for prestigious fellowships. It offers students a small college environment with the resources of a major university.

Unique majors include the *Bachelor's Degree with Individual Concentration*, through which students may design their own interdisciplinary major under faculty guidance.

*University Without Walls (UWW)* – the university's adults degree program offers students an opportunity to earn flexible, individually designed B.A. or B.S. degrees which can be interdisciplinary in nature.

*Residential Academic Programs* allow students to combine living and learning experience through residentially based academic programs, such as: Talent Advancement Programs, which offer students in a particular major the opportunity to live and study together; Thatcher Language House - a unique opportunity to speak a foreign language and share cultural activities in a residence hall setting, available to students from freshman through senior year.

Academic opportunities include *national and international student exchange programs*, internships and opportunities to engage in community service through a growing number of service learning courses in academic departments.

Students can enroll at no extra charge in courses at Amherst, Hampshire, Mount Holyoke, and Smith Colleges through the *Five College Consortium*. Five Colleges have open library borrowing, meal exchange, and a free bus system linking the campuses.
