Addendum # 2

Contract Number: UMAPP16-048 REBID
Project Number: N/A
Speedtype: 120217
Title: Franklin Dining Service Area Renovation

The attention of the bidders submitting proposals for the above subject project is called to the following addendum to the specifications and drawings. The items set forth herein, whether of omission, addition, substitution, or clarifications, are all to be included in and form a part of the proposal submitted.

The number of this Addendum (2) must be entered in the appropriate space “B. This bid includes addenda numbered (list all addenda) _____” found on Page 51 – Form For General Bid.

PART 1 – Clarifications

1. All dowel bars in exterior concrete paving or formwork shall be solid 316L stainless steel bars conforming to ASTM A955 grade 60 or higher or approved equal.

PART 2 – Changes to Drawings

1. INSERT new Sketch Detail #SK.1-Rev as attached below in PART 5 - Attachments

2. INSERT new Sketch Detail #SK.4 as attached below in PART 5 - Attachments

PART 3 – Responses to Contractor Questions Received in Writing

1. Question: In the addendum 1 on plan SK.1 there are missing words on the right side of the page next to the lines. Could you issue this plan again with the additional words that are missing?

   Answer: Please see Sketch Detail #SK.1-Rev in Part 2 above.

2. Question: Can you please clarify the drainage and water line work associated with this project?
The water line work consists of turning of installing a new campus standard hydrant and gate valve in a new location further to the east along the existing water line. There is an additional gate valve where the existing line meets the approx. centerline of Thatcher Way so the Contractor should turn the water off here and then remove and dispose of the existing hydrant and adjacent gate valve and then install the new hydrant and adjacent gate valve. This work is called out on Sheet L-5 of the Drawings.

Drainage work consists of Raising 2 Existing Storm Drainage Structures to conform with the new surface grades of the Service Area Paving Overlay – the first near the intersection of the Service Area Access Drive with Thatcher Way and the second in the SE corner of the Existing Service Area nearest to the Transformer at the NE corner of Fernald Hall. Positive surface drainage to these structures shall be ensured by the Contractor in the new grade of the CB rims and in the grading of the new bituminous overlay. This work is called out on Sheet L-4.

Question: Can you confirm if the Franklin Dining Service Area Renovation job that is out for bid requires DCAMM Certification or not? I do not see it asking for it nor do I see stating it is not required.

Answer: The Bid Forms in the Specifications are all Ch. 30, Section 39M which does not require DCAMM Certification or Filed Sub-bidders.

Question: Specifications call for a start date of June 2016 and a completion date of September 30, 2016. Since the bid date is 6/23/16 we anticipate a signed contract no earlier than August 1, 2016. Can you change the completion date to no earlier than October 15, 2016?

Answer: No, the Completion Date shall stand as September 30, 2016 as stated in the Summary Section of the Specifications. The Facilities & Campus Services Procurement Department has prioritized this contract/project and will do everything in its power to issue a contract in less than a month.

PART 4 – Attachments

1. INSERT Reference Plan & Elevation from 1963 Franklin DC Architectural Drawings

2. INSERT Reference Section/Details from 1963 Franklin DC Architectural Drawings
