

Goal: To Identify and Promote Green Products & Services on the UMass Amherst Campus:

The University of Massachusetts Amherst is committed to look for opportunities that utilize supplies that are recycled or green and to promote environmental friendly products. Some of the areas that are reviewed are cleaning and related products that are Green Seal or Ecologo certified, copier paper with pre and post consumer waste content, copier cartridges that are recyclable and furniture/fixtures that utilize recycled products in their manufacturing processes.

The University's office supply contract thru W.B Mason identifies green and recycled products that will replace non-green products so that end users have a choice when they order.

Vendors, staff and faculty are encouraged to submit ideas to the Procurement Department that can support and improve on this goal.

Your support is appreciated!
