

Weekly Hazardous Waste Inspection

- All hazardous waste must be **placed in containers that are in good condition** and can be **fully sealed** (no stoppered bottles or foil/parafilm covers). Containers must be **kept fully closed**.
- All hazardous waste must be **properly labeled** with **chemical names completely written out** (no abbreviations or chemical symbols).
- All hazardous waste containers must be kept in **secondary containment bins** that are clearly labeled “Hazardous Waste”.
- **Only hazardous waste containers** can be kept in the secondary containment bins labeled “Hazardous Waste”. The labeled bins can be used for **waste storage only**.
- **No incompatible chemicals** can be kept in the same secondary containment bin.
- **When each container is full**, a hazardous waste pickup should be **scheduled immediately**. There should **not be duplicate hazardous waste containers** with **identical** chemicals.
- Hazardous waste **bins must be inspected weekly** and **logged** below.
