

## Environmental Health and Safety's Laboratory Safety Trainings

Title of Training	Description	Required Training if:	Refresher Training is Required	Access to Training	Contact Info:
<p><b>General Laboratory Safety</b> (Includes Fire Safety, Hazardous Waste and Right to Know)</p> 	<p>This training is an overview of general laboratory safety training to familiarize workers with appropriate practices, controls and equipment for a safe laboratory environment. Personal protective equipment, fire safety, hazardous waste disposal and chemical safety are discussed.</p>	<p>You work in a laboratory that has chemical, biological, radiological or physical hazards.</p>	<p>Yes, annually</p>	<p>Your first laboratory safety training must be scheduled in a classroom (face-to-face) space. Annually thereafter you may renew on-line by taking the following OWL modules:</p> <ol style="list-style-type: none"> <li>1. Laboratory Safety</li> <li>2. Hazardous Waste</li> <li>3. Right to Know</li> </ol>	<p>Classroom training schedules are posted on-line at: <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a>                      Online training is available through OWL at: <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a></p>
<p><b>Biological Safety</b></p> 	<p>This training is general biological safety training that discusses biosafety levels, risks, rDNA regulations, containment practices, personal protective equipment, exposure control/response, and disinfection and occupational health options.</p>	<p>You work with recombinant DNA, BSL-2 agents/material which includes any human source material such as blood and cell lines in the laboratory work.</p>	<p>Yes, annually</p>	<p>Your first biological safety training must be scheduled in a classroom (face-to-face) setting. Annually thereafter you may renew on-line with the Biosafety Training Module.</p>	<p>Classroom training schedules are posted on-line at: <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a>                      Online training is available through OWL at: <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a></p>
<p><b>Hazardous Waste Management</b></p> 	<p>This training includes a review of federal and state requirements for point of generation, collection, and management of satellite accumulation areas and disposal of hazardous waste.</p>	<p>You work in a laboratory that generates chemical, biological, radiological or physical hazards.</p>	<p>Yes, annually</p>	<p>Your first hazardous waste management training is included in the classroom General Laboratory Safety. Annually thereafter you may renew on-line.</p>	<p>Classroom training schedules are posted on-line at: <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a>                      Online training is available through OWL at: <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a></p>

## Environmental Health and Safety's Laboratory Safety Trainings

Title of Training	Description	Required Training if:	Refresher Training is Required	Access to Training	Contact Info:
<b>Right to Know</b>  	<p>The training includes a summary of the employee's rights under the law (MGL 111F). It also includes information on how to read a Material Safety Data Sheet (MSDS). Finally the most critical aspect of the training is informing the employees of the specific hazards and safe work practices.</p>	<p>You work with chemicals or other hazardous materials.</p>	<p>Yes, annually</p>	<p>Your first Right-to-Know training is included in the General Laboratory safety training. Annually thereafter you may renew on-line.</p>	<p>Classroom training schedules are posted on-line at:  <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a>                       Online training is available through OWL at:  <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a></p>
<b>Radiation Safety</b>  	<p>Radiation safety training consists of two modules. The first training module covers general radiation safety, Radioactive Material (RAM) use, x-ray analytical equipment use, and laser use. The second part of the training consists of hands on training in the lab under the direction of an experienced RAM user.</p>	<p>You work in a facility that uses radioactive material, x-ray analytical equipment and/or lasers.</p>	<p>Not required at this time.</p>	<p>This training occurs in a classroom setting only.</p>	<p>To register for an upcoming Radiation Safety Training, X-ray analytical equipment use or Laser Safety training email:  <a href="mailto:radtrain@ehs.umass.edu">radtrain@ehs.umass.edu</a>                      or call 413-545-2682.</p>
<b>Radiation Safety Review</b>  	<p>Optional on-line radiation safety review is available to remind you of best practices for using radioactive material.</p>	<p>Not required at this time.</p>	<p>Not required at this time</p>	<p>Practical and classroom sessions must be completed.</p>	<p>Online training is available through OWL at  <a href="http://www.ehs.umass.edu">www.ehs.umass.edu</a></p>
<b>Non-Human Primate Biosafety</b>	<p>This training is for those individuals that work with non-human</p>	<p>if you will be working in or have direct contact</p>	<p>Yes, annual Biosafety training is required as work</p>	<p>This training is scheduled directly with an EH&amp;S</p>	<p>Maureen O'Leary (413) 545-2682  <a href="mailto:mcoleary@ehs.umass.edu">mcoleary@ehs.umass.edu</a></p>
