Dr. Villa-Komaroff is a molecular biologist who earned her Ph.D. at MIT in 1975. She was the third Mexican-American woman to earn a science Ph.D. in the United States and is a board member and chief scientific officer for Cytonome/ST. In 2013, she was named the “Woman of Distinction” by the AAUW. She is currently serving on the National Academies of Science and National Academy of Engineering Committee on Women in Science, Engineering, and Medicine, and the National Research Council Committee on Underrepresented Groups and the Expansion of the Science and Engineering Workforce Pipeline.
