The Center for Language, Speech and Hearing is dedicated to serving the speech, language and hearing needs of people having difficulty communicating. The Center staff provides a broad range of screening, evaluation, rehabilitation, treatment and consultation services for various communication disorders. Services are available for children, adolescents and adults, and can be scheduled for individual or group treatment.

**SPEECH AND LANGUAGE SERVICES**

LANGUAGE services are available for children and adults having difficulty with their language skills. These problems may be associated with stroke, head injury, cognitive-linguistic impairments, learning disabilities, Autism Spectrum Disorders, pragmatic language difficulties or developmental delays.

*Literacy and Learning* skills are necessary for students learning to read and to write. We provide assessments, intervention, and offer collaboration to plan goals and activities, and to modify the curricula.

*Augmentative Communication* services are provided for children and adults with severe speech and/or physical impairments.

SPEECH services are available for children and adults with articulation or phonological disorders, and Apraxia, as well as with communication problems associated with neurological impairments, laryngectomy, or cleft lip and palate.

*Voice* assessments and treatment are provided for children and adults with voice disorders due to vocal abuse, neurological or medically related problems.

*Fluency* assessments and treatment are provided for children and adults with fluency difficulties due to family history, genetic reasons, and/or neurologically and environmentally based causes.

*Accent Enhancement and Communication Skills* Improvement are available to non-native speakers of English who desire to improve their listening and speaking skills for everyday life and professional advancement.
HEARING SERVICES

AUDIOLOGICAL assessments are available for infants through adults. Assessments include hearing evaluations, industrial hearing conservation programs, and specialized testing such as auditory evoked potential testing.

Hearing Aid Services include a full dispensing program with a wide variety of hearing aid styles, models and technology.

(Central) Auditory Processing evaluations are available for children and adults who may have auditory perceptual difficulties.

Aural Rehabilitation services include individual and small group instruction in speech reading and compensatory strategies for children and adults with hearing loss who use hearing aids or cochlear implants.

ABOUT US

OUR PROFESSIONAL FACULTY AND STAFF are highly experienced in working with clients with a variety of communication disorders, delays and/or differences. All of the clinical staff hold their Certificate of Clinical Competence (CCC – SLP, CCC – A) from the American Speech – Language – Hearing Association (ASHA) and licensure in the Commonwealth of Massachusetts.

Services may be requested directly by the client, parent, schools, agencies, physicians and/or professionals attempting to meet the needs of the adult or child who is having difficulty communicating.
