</table>

The data can be found at the Renewable Energy Research Laboratory web site: http://www.ceere.org/rerl/rerl_resourcedata.html.

Data Recovery
All raw wind data are subjected to a series of tests and filters to identify data that are faulty or corrupted. The gross percentage of data recovered (ratio of the number of raw data points received to data points expected) and net data recovered (ratio of raw data points which passed all QA control tests to data points expected) are shown below.

- Gross Data Recovered [%] 100.00
- Net Data Recovered [%] 98.89

Maintenance Issues and Changes to Site Configuration
No maintenance or data quality events took place during January 2008.

Monthly Data Time Series
Seen below is a graph of wind speed at Paxton for the month of January 2008, at the highest height anemometer.
