Undergraduate Research Assistant Position

- Professor Han Mentzen, Department of Chemistry

- Project: Evaluation and quantification of the various flavor compounds found in hops and beer.

- Prerequisites: This is a highly analytical project so completion of Chem 315 or equivalent is preferred.

- Position: One or two students; flexible with time commitment, ideally around 10 hours/week for the academic year.

- Independent Research credit: Yes

- Application materials: unofficial transcript, letter of recommendation from Chem 315 course instructor or equivalent course.

- Send applications to: hmentzen@chem.umass.edu
