

IE 10 PeopleSoft Compatibility Workaround

Various PeopleSoft compatibility issues exist with Internet Explorer 10 (such as spinning clocks and timeouts on certain search panels). To resolve these issues PeopleSoft Finance and HR should be run in **Compatibility Mode** for Internet Explorer 10 (this is not necessary for IE 9 or other browsers). To set IE 10 to use compatibility mode, please do the following:

1. Open IE10.
2. From the top menu select **Tools → Compatibility View Settings** (If the menu is not visible, use the **Alt** key on your keyboard to toggle the menu on/off).

3. On the next window select the option **Display all websites in Compatibility View**. Click the **Close** button and you are done. IE10 should now work correctly with PeopleSoft Finance and HR.
