Limited Submission Announcement

2018 Pew Scholars Program in the Biomedical Sciences

Overview:

The Pew Scholars Program in the Biomedical Sciences supports the individual research of early career investigators of outstanding promise in science relevant to the advancement of human health.

UMass Amherst has been invited to nominate one individual for this award.

Eligibility:

- Candidates must have been awarded a doctorate in biomedical sciences or medicine.
- As of October 23, 2017, nominees must hold full-time appointments at the rank of assistant professor. Appointments such as research assistant professor, adjunct assistant professor, assistant professor research track, visiting professor, or instructor are not eligible.
- On July 7, 2017, candidates must have been in such an appointment for less than three years (not appointed before July 7, 2014), whether or not such an appointment was on a tenure track.
- All applicants must be nominated by their institution. Candidates may be
nominated by their institution twice in total.
- If an applicant's university has more than one eligible nominating institution or campus, that applicant may apply from only one institution; he or she may not reapply in a subsequent year from a different one.

**Award Background:**

- **$240,000 in flexible support** ($60,000/year over four years)
- Approximately **22 awards out of 177 applicants**
- One nominee per institution
- **UMass History of Success:**
  - 2013 - Shelley Peyton, Chemical Engineering - "Tissue-specific stem cells and breast cancer tissue tropism in bioengineered microenvironments"
- **Directory of Past Awardees** - we strongly recommend reviewing past awards to determine competitiveness.

---

**Deadlines**

**Internal:** June 2, 2017

**Sponsor:** Nominations due July 7, 2017

**Applications due October 23, 2017**

---

**Internal Application Process**

One candidate will be selected from UMass Amherst to submit to this opportunity. The internal selection process will be led by the research deans of applicants' colleges and informed by the Pew Scholars Program in the Biomedical Sciences' guidelines and submission requirements.

If you are interested in applying to this program please email a pre-proposal with the following items, in the order listed, in a single PDF by June 2, 2017 to Michelle Wonsey (mwonsey@umass.edu):

**I. A 1-2 page synopsis of your proposed research.**

- In the heading, please list: full name, position title, department, month and year of appointment as assistant professor, whether you have been the campus nominee previously and submitted an application to Pew (if so, what year), and title of the proposal.
- Please include: 1) a statement of why the research is important; 2) a brief description of your most significant research contribution to date, focusing on its creative and risk-taking elements; 3) the aims of your research, including the hypothesis and methods; and 4) your long-term goals for the proposed research. Studying past recipients and the program's website will enable tailoring your synopsis to this funder.

**II. A 4-page CV that includes:**

1) Education; 2) Employment; 3) Memberships, Honors,
and Other experience; 4) Peer Reviewed Publications; and 5) awarded research support.

III. Current and Pending support

IV. A letter of support from the chair of your department.

---

**Additional Information**

Strong proposals will incorporate particularly creative and innovative approaches. Candidates whose work is based on biomedical principles, but brings in concepts and theories from more diverse fields, are encouraged to apply. Risk-taking is encouraged.

Selection of the successful candidates will be based on a detailed description of the work that the applicant proposes to undertake, evaluations of the candidate's performance, and notable past accomplishments, including honors, awards and publications. In evaluating the candidates, the National Advisory Committee gives considerable weight to evidence that the candidate is a successful independent investigator and has published significant work.

Funding from the NIH, other government sources, and project grants from non-profit associations do not pose a conflict with the Pew Scholars Program.

To review Terms of the Award, visit the program's guidelines. If you have technical questions on the Pew Scholars Program in the Biomedical Sciences or your eligibility, please contact Liz Smith in Corporate and Foundation Relations.
