

This Spring semester I aided in the collection of and grouping of data for the annual 2023 Peer Dialogs Survey and Impact survey . Helping draft reminder email to affiliated cooperatives for responses to the annual impact survey and aiding in charts and report making processes. I was able to learn and utilize excel and data analysis skills. I was able to participate in the National Farmers Union's College Conference on Co-operatives

Looking to the 32 open co-ops websites for further info for my Research topics and conclusions for the question of ; How adherence to the co-op identity influences the recruitment of members?
