

# Non-Covered Medication

## Non-Covered Medication

Your pharmacy program provides coverage for over 4,000 prescription medications. Most medications on our non-covered list have equally safe, effective, covered alternatives for treating the same medical conditions. If a non-covered drug is approved, it will be covered at the highest tier or cost share. Check with your doctor about appropriate alternatives if you currently take any of these medications.

Please note: Your doctor may request coverage for a non-covered medication if no covered alternative is appropriate for treating your condition.

---

This list of non-covered medications is up-to-date as of January 1, 2016, and may change from time to time. For the most up-to-date list of medications that are not covered and their covered alternatives, please visit our website, [www.bluecrossma.com/medications](http://www.bluecrossma.com/medications) and proceed to the **Medications that are not Covered** section.
