Summer Undergraduate Human Testing Center Internship

UMass Amherst operates more than 30 core facilities, many of which are housed in the Life Sciences Laboratory (LSL) building which opened in October of 2016. The facilities advance the Institute’s goals to support high quality research and to enhance human health and well-being. The overall Core Facility infrastructure was made possible by a grant from the Massachusetts Life Science Center.

Description:

The Human Testing Center Core Facilities is seeking a summer intern to assist with the following:

- Assist with day-to-day operations of Core Facilities
- Coordinate scheduling of instruments
- Perform routine maintenance activities
- Assist with conducting human subjects research

More information about the facility is available here: [https://www.umass.edu/ials/human-testing-center](https://www.umass.edu/ials/human-testing-center)

Qualifications:

No previous experience is needed, but preference will be given to individuals who have worked in labs conducting human subjects work. A must is an excitement for health monitoring technology and a desire to work on studies that aim to improve human health through high quality analysis of biomarkers and behavior.

All mandatory lab and safety trainings to be completed before the start of the internship.

Training will be provided by UMass EH&S and the Human Testing Center staff.

Interns will work under the supervision of Dr. Michael Busa.

Workload:

30 hours/week – beginning June 1, 2018 or earlier.

Compensation:

$15/hour

Number of openings:

One

Please submit cover letter, resume, and one reference contact information, to cberrena@umass.edu by March 15, for priority consideration. In the subject line mention: HTC Summer Internship (your Last Name, First Name).
