

## Double Majors and Dual degrees

Students pursuing a Double Major (one degree, but two Majors recorded on the transcript) are required to complete at least 120 credits.

Students pursuing a Dual Degree (two Bachelor degrees) must earn a minimum of 150 credits, completing all of the major and college requirements for both, and also completing at least 30 additional units in residency. This must be accomplished within the normal ten semesters, unless a Dean grants an extension.

A student who has already completed one major, received one degree, and desires to return for a second Bachelor's degree, would have to reapply to UMass as a post-graduate.

Students pursuing Double Majors and Dual Degrees, with Sustainable Community Development as a Primary Major, must satisfy the general education requirements Integrative Experience (IE) and Junior Year Writing (JYW) with courses in Sustainable Community Development. The IE and JYW requirements must be completed only for the major that is listed as primary in SPIRE.
