Lofting & Bunking Instructions:

Lofting or bunking your bed can maximize the space in your room. However it can be unsafe if it is done incorrectly. We care about your safety and below have provided instructions on how to loft or bunk your bed correctly and safely by hall.

For the following halls, refer to these lofting instructions: Brown

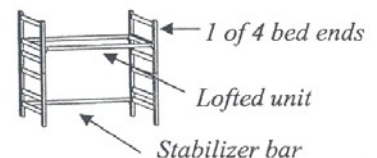

- You need a set of bed ends, a stabilizer rail, hex head bolts, barrel nuts, bunking pins and a wrench. The bed ends and stabilizer bar will be delivered. The accessories and tools can be found at the Residential Service Desk.

- Attach the stabilizer rail to the extra bed ends with the bolts and barrel nuts. See diagram to the left. Tighten with a 1/2" wrench.
- Insert the bunking pins into the top of all four corners of the lofting base.
- Lift the bed frame on top of the lofting base and on top of the bunking pins.

For the following halls, refer to these lofting instructions: Birch, Brett, Brooks, Cance, Cashin, Coolidge, Crabtree, Crampton, Dickinson, Dwight, Elm, Emerson, Field, Gorman, Grayson, Greenough, Hamlin, James, John Adams, John Quincy Adams, Johnson, Kennedy, Knowlton, Leach, Lewis, Linden, MacKimmie, Maple, McNamara, Melville, Moore, Oak, Patterson, Pierpont, Prince, Sycamore, Thatcher, Thoreau, Washington, Webster

- You need a set of bed ends, a stabilizer bar, and 4 bunking pins. (You can get more bunking pins from your Residential Service Desk.)
- Attach the stabilizer bar about half way up the post of the extra bed ends by hooking it in place. The bar needs to be secured inside of the lofting base.
- Insert the bunking pins into the top of all four corners of the lofting base.
- Lift the bed frame on top of the lofting base and on top of the bunking pins.

For all halls, refer to these bunking instructions:

- You will need four bunking pins.
- Place your bed at mid-height.
- Insert the bunking pins into the top four corners of the bed ends.
- Lift the bed frame on top of the bed ends and place on the bunking pins.
