### Notes

Number of students who completed the master's from a master's program only is reported (i.e. does not include students who were enrolled in a doctoral program and left with a master's degree).

Based on currently active master's programs with at least five students entering between 2009-10 and 2013-14. Programs with less than five students in that time frame are not shown but are included in the totals.

Data include both full-time and part-time students.

Percentages are cumulative. Students who take longer than 4 years to obtain their master's degree are included in the total percent completing their degree.
