UMass-Amherst Post Operative Record for Lab Animals

Please check the following daily for each animal that has undergone survival surgery. Space is available for 7 days of observations. Post-operative observations must continue until animal is clinically normal. Weights should be monitored post surgically until body weight has stabilized (no longer decreasing). If any animal exhibits signs of post-operative complications including post-operative pain or distress, contact Dr. J. Paul Spurlock at 413-545-5268 or at 413-992-8295.

(N = normal)
