Managerial Economics
Selected Courses

Students completing a degree in Managerial Economics (or completing degree in Resource Economics with a concentration in Managerial Economics) are required to complete 12 departmental core courses, six required courses related accounting, management, finance, industrial organization, public policy, and managerial decision making, and four selected courses.

Please note that the list below is not exhaustive and there are additional courses from departments such as Economics, Math/Statistics, and Isenberg School of Management that can be accepted towards this requirement. If you wish to take a course not on this list and have it count towards this requirement, you must receive approval from your academic advisor prior to enrolling.

As a Managerial Economics major, you do not have the ability to enroll in all of these courses through SPIRE. For courses you cannot enroll in through SPIRE, you will need to request instructor permission to enroll. For ISOM courses, submit an override request form. Prior to enrolling, please check course prerequisites and enrollment eligibility in SPIRE.
