EDUCATION AND TRAINING

Post-Doctoral Fellow, Molecular Physiology and Biophysics, 2001 - 2007, *University of Vermont*, Burlington, Vermont

Ph.D., Mechanical Engineering, 2002, *University of Vermont*, Burlington, Vermont
Dissertation: "Locomotor activity of *Drosophila melanogaster* (fruit flies) during microgravity and hypergravity exposure"

M.S., Aerospace Engineering, 1994, *University of Colorado*, Boulder, Colorado
Thesis: "Establishment of a wind turbine aerodynamic performance baseline"

B.S., Aerospace Engineering, 1992, *University of Colorado*, Boulder, Colorado

PROFESSIONAL POSITIONS

Assistant Professor, Kinesiology, 2014 - Present

Assistant Professor, Molecular & Cellular Biology Program, 2015 - Present
University of Massachusetts, Amherst, Massachusetts

Research Associate, Molecular Physiology and Biophysics, 2007 - 2014

Adjunct Lecturer/Teaching Faculty, Mechanical Engineering, 2001 - 2005
University of Vermont, Burlington, Vermont

Research Assistantships

Ph.D. *University of Vermont*, Burlington, Vermont 1995 - 2001

M.S. *National Renewable Energy Laboratory*, Golden, Colorado 1992 - 1994

M.S. *University of Colorado*, Boulder, Colorado 1992 - 1994

Visiting Researcher, Exercise Physiology Laboratory, Summer 1998, Summer 1997
NASA-Johnson Space Center, Houston, Texas

Engineering Intern, Flight Simulation Laboratory, Summer 1991, Summer 1990
NASA-Ames Research Center, Moffett Field, California

AWARDS AND HONORS

- 2017 **Butler-Williams Scholars Program**, National Institute on Aging
NIH Headquarters, Bethesda, MD
- 2011 **Ellison Medical Foundation Fellowship**, Molecular Biology of Aging Course
Marine Biological Laboratory, Woods Hole, MA
- 2003-2007 **Ruth L. Kirschstein National Research Service Award Individual Fellowship**
NIH Institutional Training Grant, University of Vermont
- 1998, 2000 **Graduate Award for Excellence in Performance and Greatest Promise of Success**
Mechanical Engineering, University of Vermont (presented yearly to one student)
- 1995-1998 **NASA Graduate Student Research Program Fellowship**
- 1991 **Tau Beta Pi** (Colorado Beta), *Academic Engineering Honor Society*
- 1990 **Golden Key National Honor Society**, *Undergraduate Academic Honor Society*

UNIVERSITY TEACHING EXPERIENCE

Graduate Courses (Instructor/Organizer), University of Massachusetts

Skeletal Muscle Physiology (Special Topic) - KIN 597K, Fall 2017

Course and laboratory that provides knowledge of multiple aspects of human skeletal muscle physiology from the molecular level to whole body performance, including alterations due to disease, disuse and aging (8 students).

Kinesiology Graduate Seminar - KIN 891, Fall 2017

Organized the weekly series that features a variety of experts in the field of kinesiology both locally and beyond, including presentations by current Ph.D. students (31 students).

Exercise Physiology Seminar - KIN 675, Fall 2014, Fall 2015, Fall 2016, Fall 2017

Presentation and discussion of current literature in exercise physiology (~10 students). Critical evaluation of research questions, experimental design, data analysis and interpretation emphasized.

Undergraduate Core Courses (Instructor), University of Massachusetts

Physical Activity in Health and Disease - KIN 247, Spring 2017 (selected lectures), Fall 2017

Sophomore-level course (~120 students) that provides fundamental knowledge underlying the health benefits of exercise and physical activity, with emphasis on heart failure, obesity and cancer.

Biomechanics - KIN 430, Fall 2014, Spring 2015, Spring 2016, Fall 2016

Senior-level course and laboratory (~120 students) that introduces mechanics and its application to human motion, including linear and angular kinematics and kinetics and elementary analysis of human motion.

Principles and Practice of Skeletal Muscle Experimentation - KIN 397L, Spring 2016

Undergraduate course (3 students) designed to provide students with theoretical and practical knowledge of current techniques in skeletal muscle experimentation at the whole muscle, tissue, cellular and molecular levels.

Undergraduate Core Courses (Instructor), University of Vermont

Design of Elements - ME 171, Spring 2002, Spring 2003, Spring 2004, Spring 2005

Junior-level course (30-40 students) that covers the design of machine elements in terms of fundamentals (Load Analysis, Materials, Stress, Strain, Failure Criteria, Reliability, and Fatigue) and applications (Shafts, Bearings, Gears, Clutches, Springs, Power Screws, and Fasteners).

Mechanical Engineering Laboratory IV - ME 183, Fall 2001, Fall 2002

Senior-level course (20-30 students) that covers the fundamentals of engineering design in class (Design Process, Design Guidelines, Design for Manufacturing and Assembly, Design for the Environment, and Cost Analysis) as well as laboratory work (Casting, Tapered Beam, etc.). Students obtained hands-on experience by designing and building their own creations for the American Society of Mechanical Engineer’s (ASME) Student Design

Competition. The two years I taught the course, my students won the Region I Division (No University of Vermont team had previously won) and took 3rd (2002) and 10th (2003) place at the National Competition.

Undergraduate Design Courses (Instructor / Advisor), University of Vermont

General Dynamics Design Process Documentation - ME 295, Spring 2003, Fall 2003

Instructor for four engineering students from the University of Vermont that worked on documenting General Dynamics' design process by following a specific part through the process and developing various flow-charts.

Designing and Building for the ASME Student Design Competition - ME 195, Spring 2002

Instructor for two senior-level engineering teams from the University of Vermont that competed in the ASME Student Design Competition. These two teams took 1st and 2nd place in the Region I Division, with the Regional 1st place team placing 3rd at the National Competition.

Designing and Building of a Sounding Rocket Payload (“Student Launch Program”) - ME 195 / 295

Fall 1997, Spring 1998, Fall 1998, Spring 1999, Fall 1999, Spring 2000

Advisor and Program Manager for 30 Electrical, Civil, and Mechanical engineering students that designed, built, and launched a payload onboard a NASA Nike-Orion Sounding Rocket. Received the Vermont Space Grant Consortium Excellence Award for this project.

Designing and Building of a Human Powered Lunar Rover - ME 195 / 295

Spring 1996, Fall 1996, Spring 1997

Advisor and Project Leader for two groups that designed and manufactured a two-person human powered lunar rover for entry in the NASA Moon Buggy competition. The first group of 11 engineers placed 6th out of 19 teams (1996). The second group of 10 engineers placed 4th out of 21 teams (1997).

OUTREACH ACTIVITIES (UNIVERSITY OF VERMONT)

Science Mentor (2010 - 2011), Mentor for an 8th grade student for his science fair project. Helped him design, perform and analyze experiments examining the velocity versus voltage relationship of various model trains.

Student Launch Program Outreach (1999 - 2009), Gave over 40 half-hour to hour long presentations to a variety of students (from 3rd graders to college seniors) and the general public about spaceflight, rocketry, and experiments flown onboard a Nike-Orion sounding rocket and KC-135 reduced gravity aircraft.

Vermont EPSCoR / Howard Hughes HELiX Program (2004 - 2005), “Building and Launching of CricketSats to Measure Various Atmospheric Conditions” - Hosted four high school students and two teachers (two teams) during a week long workshop during the summer. Acted as mentor/advisor for the research component of their project during the following academic year. Using this project, the team from Boston, MA won 1st place in the Massachusetts State Fair and 2nd place in the Boston Regional Science Fair (along with an achievement award from the Navy). The team from Milton, VT won the HELiX outreach symposium poster contest.

Science Mentor (2003 - 2004), Mentor for a sophomore-level high school student during the school year. Helped her set up, perform, and analyze an experiment examining the effects of music on human exercise performance.

Vermont EPSCoR / Howard Hughes HELiX Program (2003 - 2004), “Building and Launching of CricketSats to Measure Various Atmospheric Conditions” - Hosted three high school students and their teacher during a week long workshop. Acted as mentor/advisor for the research component of their project during the academic year following the workshop. Received a Vermont Space Grant Consortium Achievement Award for this project.

University of Vermont / Governor's Institute of Vermont 20th Anniversary Celebration (2003), Taught grade to high school students to build and launch temperature probes onboard helium-filled atmospheric balloons.

High School Engineering Internship (2000 - 2002), Advisor for a high school student that worked at the University of Vermont. The student designed and built electronics and mechanical components for two projects: (1) a centrifuge to test effects of gravity on fruit flies and (2) a device to mechanically test muscle myofibrils.

Engineering, Mathematics, and Computer Sciences Summer Program (2000), Advisor for 60 high school students that designed, built, and broke balsa wood trusses to learn about engineering.

Vermont EPSCoR/Howard Hughes HELIX Program (1999 - 2000), "Far Out Rocket sScience and Engineering (FORCE)" - Hosted two high school students and their teacher during a week long workshop. Acted as mentor/advisor for the research component of their project during the academic year following the workshop.

KC-135 Reduced Gravity Research Outreach Program (2000), Helped a 7th grade class design and build 5 experiments to fly with undergraduate students onboard the KC-135 reduced gravity aircraft.

Middle School Engineering Internship (2000), Advisor for 8th grade student that worked at the University of Vermont on various portions of the KC-135 and Nike-Orion sounding rocket projects.

KC-135 Reduced Gravity Research Outreach Program (1999), Helped 7th and 8th grade students design and build an experiment to fly with the undergraduate students onboard the KC-135 reduced gravity aircraft.
