Clinical Instructor

ABOUT OUR CENTER

The University of Massachusetts Center for Language, Speech, and Hearing is located at the Southeastern edge of the University campus. We offer a wide range of audiologic services, including hearing assessments, hearing aid fittings, and individual hearing rehabilitation. We fit a wide array of state-of-the-art digital hearing aids.

358 North Pleasant St.
Amherst, MA 01003

At the corner of Fearing and North Pleasant Streets. Our parking lot is located off Fearing Street. Handicapped parking is available.

Office: (413) 545-2565
Fax: (413) 545-8670

“I really felt the sessions were beneficial and very well presented.”
LIVING WITH HEARING LOSS
PROGRAM FOR ADULTS

Hearing aids can go a long way toward improving hearing ability in everyday listening situations. But hearing aids cannot cure a hearing problem; many people continue to experience communication difficulties, even when they are using appropriate hearing devices.

The Living With Hearing Loss (LWHL) Program at the Center for Language, Speech, & Hearing is designed for hearing-impaired adults who would like to learn new strategies for coping with difficult listening situations. The LWHL group program includes communication partners and covers such topics as speech reading, improving the listening environment, assertiveness, and problem-solving ability.

LWHL Group meets in weekly sessions and is run several times during the year. Spouses or other communication partners are encouraged to attend.

BRINGING A LOVED ONE

An important aspect of treating hearing loss is the involvement of a loved one with whom you communicate with regularly. Your loved one understands the communication challenges you both face and will play an active role in your treatment.
