

Come Grow With Us!

The 2-year program in Landscape Contracting prepares graduates for careers as crew forepersons, landscape estimators, supervisors and project managers, with skills in landscape design and construction, horticulture, and entrepreneurial business.

Learn by doing. Design outdoor spaces responsive to existing conditions, client needs, budget, and schedule. Plan projects in our studios and construction labs. Survey sites, develop estimates, and draft and present plans. Grade the landscape; select and install plants; build hardscape walkways and walls. Learn the fundamentals of a landscape construction business.

Professional landscaping careers require an investment in education, knowledge and skills. The Stockbridge name is very well known across the industry. Many of our alumni start their own companies and are now hiring Stockbridge graduates.

Tuition is free for Mass households earning under \$75k. Residents of CT and RI qualify for a Tuition Break.
