

Come Grow With Us!

The 2-year Sustainable Food & Farming program prepares graduates for careers in farming, education, and advocacy, to meet the environmental and food needs of the future.

Learn by doing on our organic 18-acre UMass Student Farm. Plan, cultivate, and harvest your own personal crop, from seed to plate! Explore new practices in soil health, carbon sequestration, and regenerative systems, including no-till, alley cropping, silvopasture, and "trap trees."

Meet the challenges of environmental change with climate-adaptive food production techniques. Stockbridge hosts the largest offering of sustainable agriculture courses in the country, and our brand is recognized industry-wide.

Tuition and fees are now free for Mass households earning under \$75k. Residents of ME, NH, RI, and VT qualify for a New England Tuition Break of nearly 20%.
