

Summary:

I worked on a wide range of projects like Corporate Social Responsibility reporting, Lucid Energy management for Cushman & Wakefield offices, LEED project, Carbon Disclosure Project reporting, UN Global Compact Communication on Progress, review of 2% CSR Spend as per the CSR Mandate (The Companies Act 2013) for C&W India and completion of EcoVadis rating 2018.

Goals:

Cushman and Wakefield, a global commercial real estate company enlisted me to work on the sustainability reporting and other public disclosures like CDP, UNGC Communication on Progress and EcoVadis rating along with building energy management portfolio for C&W offices on the Lucid Building OS software. Additionally, I worked on a BD+C LEED project and reviewed the 2% CSR Spend for C&W India office.

Solutions:

Corporate Social Responsibility report 2018:

I reviewed the draft of the 2018 CSR report and created a GRI indicator tracker including all the material topics along with the pending content as per GRI Core requirement.

Lucid Energy data management for C&W Offices:

C&W uses Lucid Building OS to provide building energy management solutions to clients. I set up an energy dashboard for C&W offices across globe on the Building OS platform. I initiated the project by creating upload templates for all offices, calculating natural gas and electricity rate structures and upload both on the platform for all locations.

LEED BD+C project:

I was onboarded on this project to get the client points for IAQ 8.2: Daylight and Views indicator. I calculated the percentage of area with access to views using the building floor plans and an excel based calculator.

UN Global Compact Communication on Progress:

I checked the sufficiency of content of the CSR report 2018 against the Ten Principles of UNGC. I provided C&W with a tracker to help them fill the CoP questionnaire.

EcoVadis Rating 2018:

I collated all documents and filled out the EcoVadis questionnaire to help C&W achieve a better score for the year of 2018.

Other projects:

I reviewed the CDP report 2018 along with the CSR team and the consultant. I also reviewed the 2% CSR Spend mandated by the Companies Act 2013 for C&W, India office.

Potential Impact:

As next steps, C&W will include UNGC Ten Principles as part of the CSR Report 2019. The Energy and sustainability team along with the CSR team will conduct capacity building workshops for facility managers to equip them to upload energy data on the Building OS platform. The data analysis that is to be conducted will help C&W analyze energy performance across all offices and help them make informed decisions. This optimized data collection will be used to track the Scope 1, Scope 2 and Scope 3 data for the CSR and CDP reports.
