

## STUDENT MAP

### About the Dashboard

This dashboard shows the location of students based on their self-reported citizenship and permanent address. This information is provided for:

- Citizenship Country
- Country
- State

By default, the dashboard shows the citizenship country of all enrolled students.

University of  
Massachusetts  
Amherst

Student Map

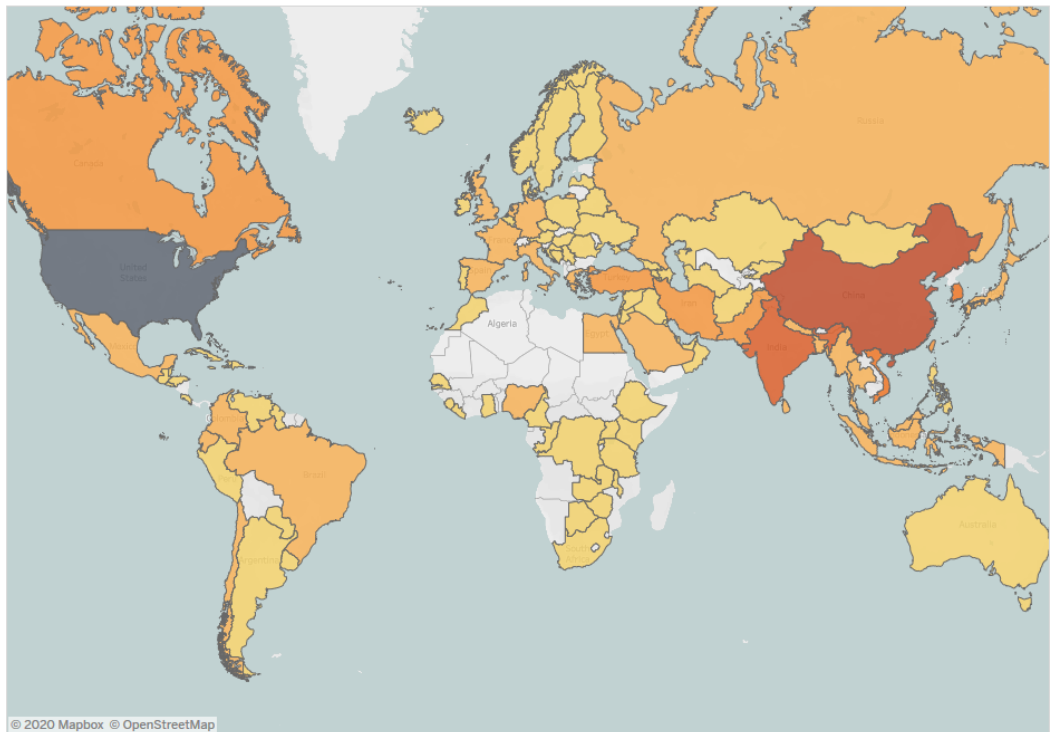

Geographic Detail  
Citizenship Country

Includes all students enrolled in a class (excludes students away on exchange), each student is only counted once in their primary major. Students are shown based on their self-reported citizenship and permanent address.

Version: Official  
Term: Fall 2019  
State-supported/UWW: (All)  
Degree Level: (All)

Student Enrollment by Citizenship Country, Fall 2019

### How you can use the Data

You can use the data on this dashboard to answer questions such as:

- Do we have students from all fifty states?
- Other than Massachusetts, where do the most UWW students come from?
- What countries did our students come from in Fall 2018?

## About the Data

A “snapshot” is taken of university data each semester, on the weekend after the add/drop period ends. The data captured in this snapshot are referred to as **Official** on this dashboard and match data published by Institutional Research. This contrasts with **Live** data which gives a current look at the University’s data (refreshed nightly). For past semesters, these data can differ from the official data because of changes that occur during the semester (e.g. major declaration) or after the semester (back dated information). For current and future semesters, live data show what is in progress and may look very different from past terms (e.g. enrollment for a future term will look low if not everyone has registered).

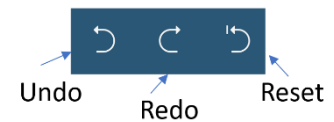

### Data Descriptions

*State-supported/UWW:* The source of funding that supports the program of study. Contrasts state-supported with self-supporting (UWW) programs.

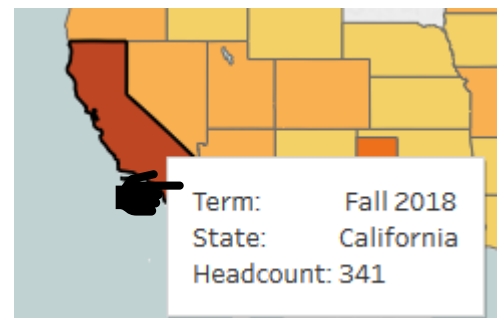

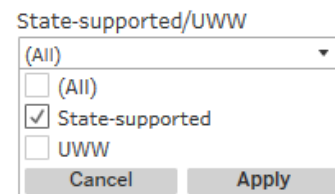

*Degree Level:* Includes undergraduate, graduate and non-degree options.

## Dashboard Tips

- Navigation buttons on the upper left of the dashboard will let you **Undo** your last action or **Reset** back to the original dashboard view.
- When exploring data, keep in mind which filters you have set. Sometimes it helps to **Reset** to the original dashboard view and start again.
- To use a filter, click on the boxes next to the features you want to see and then click **Apply**.

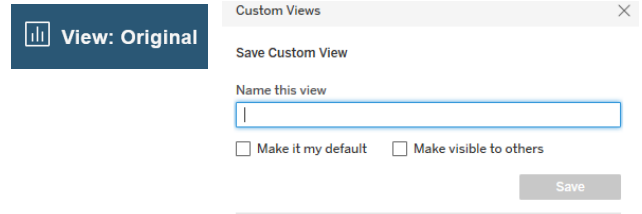

- To learn more details about information in a chart, hover your cursor and a **Tooltip** will appear.

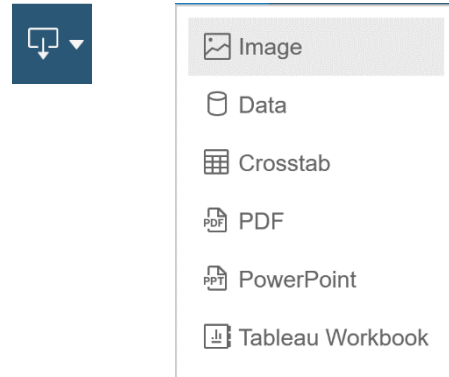

- Map navigation tools: The magnifying glass brings up a search box for finding locations; **+** and **-** are used to increase/decrease the zoom of the map; clicking the Home reverts the map back to its original positioning; the tools at the arrow help you select and navigate to different areas of the map. Hovering over these tools tells you what they do.

- Use the **View: Original** button on the upper left of the dashboard to save (and share) a custom view (a version of the dashboard with specific filters selected).

- Use the **Download** button on the upper right of the dashboard to download an **Image** or **PDF** of the visual. A file will be downloaded to your computer.
