

Brian Kuhn is Director of Development for Aeronautica Windpower of Plymouth, MA which manufactures 225 and 750kW wind turbines from their factory in Durham NH. He is also a principal in Associated Wind Developers, a project development company that was formed to develop distributed generation sites and small wind farms domestically and around the world. Brian holds a degree in 'Renewable Energy and Business' UMass, Amherst where he graduated in 1977. While at UMass he was one of the original members of the Wind Furnace program that went on to become the UMass Renewable Energy Research Lab.
