## Data Update for Paxton, MA September, 2008

Prepared for  
Massachusetts Technology Collaborative, 75 North Drive, Westborough, MA 01581  
By Eric Morgan

### Monthly Data Summary for September, 2008

This update summarizes the monthly data results for the Paxton, MA monitoring site at 42° 18' 11.6" N, 71° 53' 50.9" W (WGS84). More information on the sensors and site can be found at [http://www.ceere.org/rerl/rerl\\_resourcedata.html](http://www.ceere.org/rerl/rerl_resourcedata.html).

Height	Prevailing Wind Direction
78m	67.5

The data can be found at the Renewable Energy Research Laboratory web site: [http://www.ceere.org/rerl/rerl\\_resourcedata.html](http://www.ceere.org/rerl/rerl_resourcedata.html). It is important to note that summary data are only reported when the monthly net data recovery (see below) is at least 90%. This requirement ensures that the values reported here are comparable with values from other months.

### Data Recovery

All raw wind data are subjected to a series of tests and filters to identify data that are faulty or corrupted. The gross percentage of data recovered (ratio of the number of raw data points received to data points expected) and net data recovered (ratio of raw data points which passed all QA control tests to data points expected) are shown below.

Gross Data Recovered [%]	100.00
Net Data Recovered [%]	100.00

### Maintenance Issues and Changes to Site Configuration

No maintenance or data quality events took place during September, 2008.
